Education for Peace ASCD 1973 Yearbook Committee, 1973-01-01 *Resources in Education*, 2001-10 **Research in Education**, 1973-12 Exploring Betty A. Reardon's Perspective on Peace Education Dale T. Snauwaert, 2019-05-15 This book presents commentaries by a leading international group of peace education scholars and practitioners concerning Reardon's peace education theory and intellectual legacy. The guiding question throughout the book is: How can her foundational work be used to advance the theory and practice of peace education? In an attempt to find answers, the contributing authors explore three general areas of inquiry: 1. Theoretical Foundations of Peace and Human Rights Education; 2. Feminism and the Gender Perspective as Pathways of Transformation Toward Peace and Justice; and 3. Peace Education Pedagogy and Practices. A contemplative commentary by Reardon herself rounds out the coverage. Routledge International Companion to Education Miriam Ben-Peretz, Sally Brown, Bob Moon, 2004-04-28 The Routledge International Companion to Education addresses the key issues underpinning the rethinking and restructuring of education at the beginning of the new millennium. The volume contains over fifty major contributions exploring a wide range of issues including philosophy of education, the economics and resourcing of education, testing and assessment, current issues and future prospects, standards, multiculturalism, anti-racism, computers in classrooms, mother tongue education, civics and moral education. Each chapter gives a contemporary account of developments in the field and looks to the future and the directions that new activity and inquiry are likely to take. All the chapters are written from an international perspective. **Human Rights and World Public Order** Myres Smith McDougal, Harold Dwight Lasswell, Lung-chu Chen, 2019 As a classic text of the New Haven School of International Law, this book explores human rights and international law in the broadest sense, taking into account social sciences research while embracing all values secured or consequently fulfilled or needed to thus be achieved. The re-issuance of this venerable title unveils this work to a new generation of scholars, students and practitioners of international law and human rights. Spring,2014-04-08 In this book Joel Spring explores three major international educational ideologies that are shaping global society neo liberal educational ideology human rights education and environmentalism Neo liberal ideology reflects a rethinking of nationalist forms of education as the nation state slowly erodes under the power of a growing global civil society Traditional nationalist education attempts to mold loyal and patriotic citizens who are emotionally attached to symbols of the state whereas the goal of neo liberal educational ideology is to change nationalist education to serve the needs of the global economy These changes are fueling a clash between the ideas of free market and consumer based neo liberals and those of human rights and environmental educators Human rights education is concerned with creating activist global citizens It is rooted in the idea that inherent in human rights doctrines is a collective responsibility to ensure the rights of all

people Environmentalism is the most radical of the ideologies because it rejects the industrial and consumerist paradigm that has dominated most economic thought including capitalism and communism Spring synthesizes and analyzes the effect of these educational ideologies on shaping the future of the global society In the concluding section he compares the effect of these ideologies on global society with the possibility of a world divided between conflicting civilizations How Educational Ideologies Are Shaping Global Society Intergovernmental Organizations NGOs and the Decline of the Nation State features a critical exploration of the transition of schooling from a function of the nation state to a globalized economic and political system a discussion of the major organizations and trading blocs shaping the future globalization of educational policies an analysis of the major competing global ideologies of education including national and corporate models that emphasize training workers for a competitive global free market the worldwide network of human rights and peace educators who are teaching a global set of ethics and the environmental movement s efforts to create a common set of educational standards for sustainable development and sustainable consumption and an exploration of the possible future of global educational policy and school organizations By integrating a wide range of previously scattered information within a bold new framework for understanding educational ideologies and their impact on the global society Spring raises important questions for researchers professionals and students in history and philosophy of education educational policy educational studies comparative education multicultural education curriculum studies critical media studies global studies human rights education and related areas

Marie Durham,2012-11-29 We all feel the pull that innate knowing that we were put here on this earth for some important purpose greater than ourselves But how can we realize that calling in a world that seems so utterly broken and in perpetual turmoil How can one person make a difference How do we help others when overcoming our own personal problems seems so overwhelming It is simply by rediscovering our connectedness through community participation that both our inner and outer worlds begin to transform The Gifts of Community reveals the mutual path to personal and community development a path that has been well hidden behind cultural messages of competition and self preservation By sharing your gifts with others you are gifted with all that you have felt has been missing in your life You grow as a person realize your dreams develop your talents and meet your soul partners And as you realize this potential and begin to think in the mindset of community the world around you will change for the better as well Community is a grand scale gift exchange As you give good to others good comes back to you Departments of Labor, Health and Human Services, Education, and Related

Agencies Appropriations for 1999 United States. Congress. House. Committee on Appropriations. Subcommittee on the Departments of Labor, Health and Human Services, Education, and Related Agencies,1998 *Human Rights Education and the Politics of Knowledge* Joanne Coysh,2017-02-24 Around the world there are a myriad of NGOs using human rights education HRE as a tool of community empowerment with the firm belief that it will help people improve their lives One way of understanding these processes is that they translate universal human rights speak using messages and symbols which make them relevant to people s daily lives and culturally resonant However an alternative more radical perspective is that these processes should engage individuals in modes of critical inquiry into the ways that that existing power structures maintain the status quo and control not only how we understand and speak about social inequality and injustice but also act on it This book is a critical inquiry into the production distribution and consumption of HRE and how the discourse is

constructed historically socially and politically through global institutions and local NGO practice The book begins with the premise that HRE is composed of theories of human rights and education both of which are complex and multifaceted However the book demonstrates how over time a dominant discourse of HRE constructed by the United Nations institutional framework has come to prominence and the ways it is reproduced and reinforced through the practice of intermediary NGOs engaged in HRE activities with community groups Drawing on socio legal scholarship it offers a new theoretical and political framework for addressing how human rights pedagogy knowledge and power can be analysed between the global and local by connecting the critical but well trodden theories of human rights to insights on critical pedagogy It uses critical discourse analysis and ethnographic research to investigate the practice of NGOs engaged in HRE using contextual evidence and findings from fieldwork with NGOs and communities in Tanzania Sourcebook of the World's Religions Joel

Beverluis,2011-02-08 Now in its third edition this is the most comprehensive work available on the rich variety of paths available to today s spiritual seekers More than an academic reference it explores how religions can collaborate to help the world Essays exploring the realm of building an interfaith community add to the book s detailed portraits of the major religious traditions The Sourcebook also contains essays on spiritual practices as diverse as theosophy wicca and indigenous religions This revised edition of the Sourcebook offers an unparalleled look at where spirituality is headed in the coming millennium
