Educational Partnerships And The State The Paradoxes Of Governing Schools Children And Families:

Educational Partnerships and the State: The Paradoxes of Governing Schools, Children, and Families B. Franklin, M. Bloch, T. Popkewitz, 2003-12-18 Educational Partnerships and the State is a compelling collection of essays by an international group of scholars that provides a critical exploration of the role of partnerships in contemporary educational reform. Their focus is on the expanding role that collaboration between the public and private sector has come to play in the governing of schools, children and families in response to an array of worldwide economic and social changes. The contributors to this volume highlight the new relationship between civil society and the state through partnerships and what that linkage has come to mean for an array of educational issues including academic achievement, school governance, school-parent relationships, teacher education, the construction of family and community involvement, and the discourses of reform as practices that order participation and action.

Schools and Cultural Citizenship Pat Thomson, Christine Hall, 2023-02-24 Why study the arts at school? This book offers a fresh perspective on this question. Informed by rigorous research, the book argues that the arts help young people to develop key skills, knowledge and practices that support them to become both critical appreciative audiences and socially engaged cultural producers. Drawing on a three-year study in partnership with the Royal Shakespeare Company and Tate art museum, *Schools and Cultural Citizenship* sets out an ecological model for cultural citizenship that goes beyond the classroom to include families, the media and popular culture. The authors introduce new interrelated concepts to change how we consider arts education. Chapters provide fresh insights, guidance and practical recommendations for educators, including: An introduction to the Tracking Arts Learning and Engagement research; Detailed case studies featuring arts-rich schools and arts broker teachers; Analysis of the importance of immersive professional development for teachers and the benefits of partnerships with arts organisations; An ecological model for cultural citizenship; Focusing on the ways in which cultural citizenship can be taught and learnt; this is an essential read for arts educators, education staff in arts organisations, researchers, postgraduate students, arts education activists and policy makers.

Canadian Education Brenda L. Spencer, Kenneth D. Gariepy, Kari Dehli, James Ryan, 2012-10-17 *Canadian Education: Governing Practices and Producing Subjects* is an absolutely critical volume bridging a number of key areas in Canadian education: classroom politics, schools, teachers' work, higher education and much more, with the theoretical contributions of Michel Foucault. The result is illuminating, engaging and critically provocative. The essays are carefully chosen and utilize Foucauldian concepts such as governmentality, discipline, subjectivity and genealogy to excellent critical effect. With a skillfully crafted introduction that nicely brings the entire collection into sharp focus, the editors have provided a text that is a

must read for critical scholars and students alike Mona Gleason Department of Educational Studies University of British Columbia This excellent text presents a Foucauldian analysis of selected educational practices contemporary reform initiatives and current educational policy in the Canadian context The authors demonstrate how rich theoretical constructs such as bio power governmentality and disciplinary power can illuminate everyday practices and policies making the cultural unconscious apparent Foucault 1989 p 71 Canadian Education Governing Practices and Producing Subjects is essentially a hopeful book it demonstrates the radicalizing role of theory as we try to understand and complicate educational structures and processes This is an essential text for all those interested in Foucauldian analyses of education and a must read for undergraduate and graduate students in Canadian faculties of education Anne M Phelan University of British Columbia This volume is most useful in the ways in which it achieves a close look and a wide sweep of education policy its deployment and its effects as these are embedded in schooling practices educational strategies and pedagogy It offers the ground from which to consider the potential for education to be aimed at the development of a socially just citizenry while also helping to reveal the structures of power and processes of social control that operate within current neoliberal technologies of governmentality It is against these that reform minded educators and curriculum and policy developers can set themselves While theoretically complex and original in its conceptual approach this book is also practically informative and eminently readable making it useful to teachers school administrators education policy developers parents students and communities at all levels of the schooling spectrum Magda Lewis PhD Professor and Queen s National Scholar Queen s University Kingston Magda Lewis Ph D Professor and Queen s National Scholar Queen s University Kingston

Achieving Education for All through Public-Private Partnerships? Pauline Rose, 2013-09-13 Concern for achieving Millennium Development Goals MDGs by 2015 has led to a focus on the role that non state providers NSPs can offer in extending access and improving quality of basic services While NSPs can help to fill a gap in provision to those excluded from state provision recent growth in both for profit and not for profit providers in developing countries has sometimes resulted in fragmentation of service delivery To address this attention is increasingly given in the education sector

to developing partnerships between governments and NSPs Partnerships are further driven by the expectation that the state has the moral social and legal responsibility for overall education service delivery and so should play a role in facilitating and regulating NSPs Even where the ultimate aim of both non state providers and the state is to provide education of acceptable quality to all children this book provides evidence from diverse contexts across Africa South Asia and Latin America to highlight the challenges in them partnering to achieve this This book was published as a special issue of Development in Practice

pass fifty years Much of the debate in the public and political arenas has been driven by narrow and expedient consideration and too much of it demonstrates a poor grasp of the deep and complex issues which teacher education in a democracy must confront At the same time there has been a serious educational debate which has focused on what a well trained teacher ought to be able to do and what methods of training and education can produce competent teachers The chapters of this book address these issues in a critical way asking what should the objectives of teacher education be The authors demonstrate the international reach of the debate over teacher education and they ground their discussions within the national contexts of their own experience All the authors share the view that teacher education involves much more than acquiring a set of skills and techniques Important as these are the well trained teacher needs for example to have an understanding of the contexts of teaching of the reasons why we teach of the role of schools as institutions within political environments as well as a coherent perspective on curriculum and the relevant bodies of theory which give overall point to what is being done What teacher education entails will probably never be beyond contestation at least not so long as it takes place within capitalist democracies These democracies with their tensions running between liberal ideals and economic imperative push and pull teacher education in contradictory directions At present educational ideals seems too quickly and too dogmatically to be traded for immediate fiscal policy The authors of these chapters articulate the reasons why such short term thinking will be detrimental to any approach to teacher education which commits itself to producing well rounded and comprehensively professional teachers
