Educational Countercultures Confrontations Images Vision:

Discourses of Education in the Age of New Imperialism Jerome Satterthwaite, Elizabeth Atkinson, 2005 This fourth volume in the Discourse Power Resistance series takes the theme into new territory setting educational thinking and practice firmly in its global political context Drawing on schools of thought as diverse as Marxism and eco feminist theology the contributors to Part 1 Global Imperialism and Terror The Theory and Practice of Othering led by Peter McLaren examine the possibilities for critical thinking and transformative practice in the aftermath of 9 11 and the new age of cultural and political imperialism In Part 2 Praxis Thinking and Doing contributors draw on a range of critical perspectives to examine both the theory and practice of education taking the reader from the self to the system and back again via dynamic systems theory flow theory and a multiplicity of diverse and often conflicting practices of subversion The book closes with two radical departures from the norm a seriously playful transgression into the fields of pop art and film and a searing poetic lament on the current state of educational policy and practice As educators we are all in William Pinar s words behind enemy lines in a field which despite our continued bids for autonomy is increasingly hijacked by globalizing political forces This book offers modes of resistance which are startling unsettling and challenging It will be of deep interest to students tutors and researchers in education policy studies and related fields and to those who are involved in training or becoming the educators of the future The contributors are Peter McLaren William Pinar Mike Cole Lisa Isherwood Elizabeth Atkinson Tamsin Haggis Sue Clegg Gill Boag Munroe Ros Ollin Victoria

Judith Butler and Education Deborah Youdell, 2020-04-22 The work of Judith Butler has been at the forefront of both theorising the subject as a product of power and explicating possibilities for political alliances and action that are available to such subjects Mobilising a range of philosophical resources from Hegel and Foucault to Lacan Levinas Wittig and Arendt her work has held a core concern with the way that the subject is made in terms of sex gender and sexuality and has been an invaluable resource in the development of queer theory and thinking about queer practice Butler's scholarly work has been aimed primarily at a philosophical audience yet her insights into the constitution constraint and agency of subjects are profoundly political and have become invaluable resources in feminist queer anti racist and anti capitalist work Over the last two decades she has been a major influence on research concerned with social justice in education and has changed the ways that classroom practices and relationships can be understood transforming the way we think about both teacher and student This collection brings together some of the most outstanding work in education that has developed and applied Butler's work to empirical questions translating her philosophy for an education audience and providing compelling analyses of the ways that the subjects of education are made how inequalities are produced in the minutiae of practice and how education's subjectivated subjects can act politically The chapters in this book were originally published as articles in Taylor and Francis journals

Thinking with Metaphors in Medicine Alan Bleakley, 2017-07-06 While medical language is soaked in metaphor and thinking with metaphor is central to diagnostic work medicine that is medical culture clinical practice and medical education outwardly rejects metaphor for objective literal scientific language This thought provoking book argues that this is a misstep and critically considers what embracing the use of metaphors and similes might mean for shaping medical culture and especially the doctor patient relationship in a healthy way Thinking With Metaphors in Medicine explores how metaphors

inhabit medicine sometimes for the better and sometimes for the worse and how these metaphors can be revealed appreciated and understood how diagnostic work utilizes thinking with metaphors how patient doctor communication can be better understood and enhanced as a metaphorical exchange how the landscape of medicine is historically shaped by leading or didactic metaphors such as the body as machine and medicine as war which may conflict with other values or perspectives on healthcare for instance person centred care Outlining the kinds of metaphors and resemblances that inhabit medicine and how they shape practices and identities of doctors colleagues and patients this book demonstrates how the landscape of medicine may be reshaped through metaphor shift It is an important work for all those interested in the use of language and rhetoric in medicine whether hailing from a humanities social science or healthcare background **Self-Study and**

From Technicians to Teachers Leon Benade, 2012-12-06 From Technicians to Teachers provides theoretical and practical reasons for suggesting that widespread international curriculum reform of the post 1990 period need not deprofessionalise teaching The widely held deprofessionalisation thesis is both compelling and fatalistic leading to a despairing sense that teachers are either no more than technicians or that they can be reprofessionalised through definitions of effective teachers promoted by the reforms However there are many teachers who do not see their work in either of these ways The book is structured around an in depth case study detailing the implementation of The New Zealand Curriculum in that nation one of the best international examples of neoliberal reform Benade argues that curriculum policy can and should be analysed critically while pointing out the dangers for ethical teachers that can exist in national or state curricula Energising and inspiring this book reminds teachers and teacher educators that although they work in a globalised context their own role is fundamental and has a profoundly ethical basis despite the negative impacts of three decades of education reform
