Challenges of Globalization Marika Lerch, 2017-12-02 Globalization has been the buzzword in international political and academic discourse since the 1990s It is used as a general descriptor of a world in which borders are becoming less and less important while transnational flows of capital and goods but also of ideas and people cultural norms and values crime war and viruses are increasing If globalization's dynamics are to be fully understood a reasonable critique is to be formulated and realistic political proposals to meet the challenges of globalization are to be developed this complex phenomenon must be dissected Challenges of Globalization brings together prominent authors of different national backgrounds They look beyond the buzzword to provide a genuinely global view of globalization The editors introduction provides a roadmap through the globalization debate and shows the connections between the different aspects covered in detail in the various contributions This volume deals with two major issues first the economic societal ecological and political consequences of globalization including but also going beyond the identification of globalization's winners and losers worldwide and second solutions that have emerged from the current political debate to cope with the various challenges These include the creation of new global

governance structures fostering a global civil society that might enhance the democratic legitimacy of global governance and strategies to be implemented at national and regional levels allowing states to adapt in ways that make liberalization compatible with development in poor countries and enable the rescue of the welfare state in rich countries Challenges of Globalization serves as a multi dimensional and accessible introduction to the globalization debate and will be of particular interest to academics policymakers and international agencies
