Einsteins Space And Van Goghs Sky:

Einstein's Space and Van Gogh's Sky Lawrence L. LeShan, Henry Margenau, 1982 **Revelation of Modernism** Albert Boime, 2008 Examines the work of postimpressionist painters Van Gogh Seurat Cezanne and Gauguin and how they responded to cultural and spiritual crisis in the avant garde world Boime reconsiders familiar masterpieces and draws analogies with literary sources and social personal and political strategies to produce revelations that have eluded most art historians Provided by publisher **The Pattern of Evil** Lawrence LeShan Ph.D., 2006-01-23 If we wish to learn from the Holocaust how to act against a recurrence we must ask what the SS thought they were doing as they organized and ran the horrific camps Then we can know how to watch for early signs of the emergence of this type of thinking and move against it This book addresses itself to this problem and arrives at new answers Modern science and philosophy have gradually become aware of the degree to which human beings use different sets of assumptions about the nature of reality how things are and work in different situations As this book demonstrates when the Mythic world picture is used to solve political problems instead of the appropriate Sensory world view the concentration camp becomes a possibility The process however is not inexorable but can be aborted if understood **Patterns of Rogerian Knowing** Mary Madrid, 1997 The scholarship from the most recent Rogers Conferences at New York University has furthered the evolution of the Science of Unitary Human Beings This new index on Rogerian thought addresses Martha Rogers legacy presents creative research methods and offers medical practitioners views on Rogerian science Rogerian science based nursing research and innovative applications are also presented 1997 304 pages Japanese Fiction of the Allied Occupation Sharalyn Orbaugh, 2007 The reconstruction of identity in post World War II Japan after the trauma of war defeat and occupation forms the subject of this latest volume in Brill s monograph series Japanese Studies Library Closely examining the role of fiction produced during the Allied Occupation Sharalyn Orbaugh begins with an examination of the rhetoric of wartime propaganda and explores how elements of that rhetoric were redeployed postwar as authors produced fiction linked to the redefinition of what it means to be Japanese Drawing on tools and methods from trauma studies gender and race studies and film and literary theory the study traces important nodes in the construction and maintenance of discourses of identity through attention to writers representations of the gaze the body language and social performance This book will be of interest to any student of the literary or cultural history of World War II and its aftermath Japanese Fiction of the Allied Occupation was awarded Choice Outstanding Academic Title 2007 On Becoming a Biologist John Janovy, 2004-01-01 We share a common bond with even the most bizarre beetle of the Peruvian rain forest asserts John Janovy Jr A belief in that common bond might in fact be the most fundamental characteristic of a biologist And biologists see the worth of a plant or an animal not in monetary terms but in its contribution to our understanding of life The famous naturalist brings a humanist s vision to this superbly written book On Becoming a Biologist is grounded in reality cognizant of practical matters education and jobs as well as the ideals that

inform the profession a reverence for life and a responsibility to humankind and its future Janovy draws on his experiences as a graduate and postdoctoral student on his rewarding relationships with teachers and on his fieldwork as a naturalist This edition includes new information throughout the book regarding pertinent events issues and changes in technology

Acorns: Windows High-Tide Foghat Joshua Morris, 2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self Having chosen to focus upon ego established securely by the time of Christ much more beta brain wave development will destroy our species and others which process has already begun We create our own realities through beliefs intents and desires and we were in and out of probabilities constantly Feelings follow beliefs not the other way around

An Introduction to Comparative Philosophy Walter Benesch, 1997-01-31 This original and accessible text is more than an introduction to comparative philosophy in the East and West It is also a guide to philosophizing as a thinking process In addition to outlining the presuppositions of different traditions it discusses their methods and techniques for reasoning in what the author calls four dimensions of philosophical space object subject the situational and the aspective perspective dimension

A New Science of the Paranormal Lawrence LeShan, 2013-08-15 Mainline science rejects the paranormal because it cannot be proven by the classical methods of controlled experiments But sciences such as geology astronomy and anthropology also don't rely on laboratory testing for repeatable results Moreover psi concerns consciousness which is by definition nonquantitative Psi researchers must stop acting like science's poor relations says author Lawrence LaShan limiting themselves to controlled experiments such as analyzing statistics of people guessing cards being flipped in the next room This provocative book outlines the principles of making a real study of the large exciting events clairvoyance and precognition mediumship and spirit controls psychic healing that would bring mainline science into and revitalize the whole field And the issue is not just academic says LeShan The old materialistic worldview has not worked Psychic research he argues can transform our sense of reality itself to offer a new and more hopeful picture of ourselves and of the world

Mathematical Principles of Decision Making (Principia Mathematica Decernendi) Thomas L. Saaty, In this book Thomas Saaty summarizes his Analytic Hierarchy Process AHP theory for measuring intangible factors through paired comparisons using judgments from which priorities are derived that give the relative dominance of these factors The important concepts of the AHP and its generalization to structures with dependence and feedback the Analytic Network Process ANP are presented in an elegant compact way and new extensions of the theory to complex decisions involving benefits opportunities costs and risks are presented Applications to resource allocation and conflict resolution are included The generalization to continuous comparisons is covered The Encyclicon three volumes are now available is an encyclopedia of applications that is a useful accompaniment to the Principles of Mathematical Decision Making containing of examples of practical decisions

A Pliocene Companion Julian May, 1984-11-27 The author of the acclaimed Pliocene Quartet offers an in depth guide to a saga that has most closely matched J R R Tolkien's achievement San Francisco Chronicle With its richly imagined universe

and large cast of finely drawn characters Julian May's Saga of Pliocene Exile has won devoted fans across the globe who find new layers details and ideas with each reading In the words of Isaac Asimov's Science Fiction Magazine Julian May has made a new and fresh masterwork in the genre and has irrevocably placed herself among the great of fantasy and science fiction Covering all four novels *The Many Colored Land* *The Golden Torc* *The Nonborn King* and *The Adversary* this reading guide offers a plot chronology the author's original maps a descriptive listing of all the characters and three delightful interviews with May herself Beyond that it gives the reader a chance to explore further the surroundings of a world six million years in the past The glossary gives information on metapsychology on the futuristic science of the Galactic Milieu and on the exotic world of the Tanu and Firvulag In all A Pliocene Companion is a must for followers of the Saga *The Pattern of Evil* Lawrence Leshan, 2006 If we wish to learn from the Holocaust how to act against a recurrence we must ask what the SS thought they were doing as they organized and ran the horrific camps Then we can know how to watch for early signs of the emergence of this type of thinking and move against it This book addresses itself to this problem and arrives at new answers Modern science and philosophy have gradually become aware of the degree to which human beings use different sets of assumptions about the nature of reality how things are and work in different situations As this book demonstrates when the Mythic world picture is used to solve political problems instead of the appropriate Sensory world view the concentration camp becomes a possibility The process however is not inexorable but can be aborted if understood

Patriotism for Grownups Eda J. LeShan, Lawrence L. LeShan, 2005 Patriotism is loyalty to a group We regard the person without it as paltry at best Historically the size of the group to which most of us have been loyal has increased from the family to the tribe to the city to the state or province and now to the nation Today our children use the Internet as if there were no such things as national borders We all know the radioactive clouds viruses the clean air from healthy oceans and rainforests and the polluted air from uncaring human acts do not notice the fences and custom offices that mark off spaces as separate countries on our only beautiful planet We have for the first time in history an opportunity and necessity to continue the great slow movement of patriotism toward inclusion of all human beings This book is a handbook on how to do this not to make our loyalty to our native country less but to make our loyalty to the entire human race more The great Utopian goals have all failed and we have little interest in them today The way to go forward is in small steps and actions that can be done without major changes in our everyday life Eleanor Roosevelt wrote It is better to light one candle than to curse the darkness If enough of us light one candle each we will have a blazing light to guide us to a brighter future **Dictionary Of Modern American Philosophers** John R. Shook, 2005-05-15 The Dictionary of Modern American Philosophers includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from

philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought

Toward the Integration of Theory, Methods, Research, and Utilization Gary T. Moore, Robert W. Marans, 2013-03-09 This fourth volume in the Advances in Environment Behavior and Design series continues the intent of earlier volumes by exploring new directions in the multidisciplinary environment behavior EB or EBS field The series is organized around a framework of theory methods research and utilization that some say has defined the field for the past 15 years This fourth volume is devoted to chapters that explore the integration of theory quantitative and qualitative research and utilization in policy planning and architecture The authors selected for this volume exemplify the multidisciplinary character of the field they have been selected from architecture environmental psychology environmental studies housing research landscape architecture social anthropology social ecology urban design and urban planning from academe and practice and from Australia Europe and North America

HISTORY OF THE ADVANCES SERIES The idea for the series emerged in 1983 at meetings of the Board of Directors of the Environmental Design Research Association EDRA Several publishers were contacted about the possibility of an EDRA Annual Review Eliot Werner at Plenum Press expressed great interest but suggested that an Advances series would be more appropriate since publication could be tied to a less specific timetable EDRA Plenum and the editors signed a contract in June 1984 for three volumes with an open door for oral agreements between Plenum and the editors after that time Four volumes have been published Volume 1 1987 Volume 2 1989 Volume 3 1991 and the current Volume 4 each containing 10 to 12 chapters

Reductionism Richard H. Jones, 2000 Reductionism's approach brings together many of the most interesting questions today in philosophy consciousness and computers and in science issues of complexity and self organization It also presents a brief history of how reductionism has developed in Western philosophy and religion with reference to Indian philosophy on certain issues

Existential-Phenomenological Perspectives in Psychology Ronald S. Valle, Steen Halling, 2013-03-08 When I began to study psychology a half century ago it was defined as the study of behavior and experience By the time I completed my doctorate shortly after the end of World War II the last two words were fading rapidly In one of my first graduate classes a course in statistics the professor announced on the first day Whatever exists exists in some number We dutifully wrote that into our notes and did not pause to recognize that thereby all that makes life meaningful was being consigned to oblivion This bland restructuring perhaps more accurately destruction of the world was typical of its time 1940 The influence of a narrow scientific attitude was already spreading throughout the learned disciplines In the next two decades it would invade and tyrannize the social sciences education and even philosophy To be sure quantification is a powerful tool selectively employed but too often it has been made into an executioner's axe to deny actuality to all that does not yield to its procrustean demands

Restorative Justice Gerry Johnstone, 2013-03 The second edition of this renowned text explores the implications of developments in the restorative justice campaign to provide a feasible and desirable alternative to mainstream thinking on matters of crime and justice It includes a new chapter identifying and analyzing fundamental shifts and developments in restorative justice thinking over the last decade
