Ethics Enhance Good Quality of Life Alex C. Michalos, 2017-06-14 This volume provides bridges from the social sciences to business ethics and from the latter to the quality of life by connecting the research themes of quality of life social sciences including public policy making and business ethics or corporate responsibility It builds on the premise that public policy making is essentially a species of good decision making as explained in the first volume It shows that because most developed countries function as market economies whose governments depend on taxation to pay for their services and because a large proportion of government revenue comes from well regulated responsible corporations the quality of people's lives is highly dependent upon good public policies taxation and business ethics The volume presents and examines ethical moral problems arising in market economies since the first century BCE including the first appearance of the business case for business ethics fourteen arguments concerning the neglect of business ethics business ethics issues for the 1990s and beyond the loyal agent's argument advertising the importance of trust public opinion polling public program evaluation and a critique of the relatively new monster of super capitalism In addition it deals with connections among the concepts of

efficiency morality and rationality related to decision making in general and public policy making in particular Finally it explains relationships between outcomes measurement and performance indicators in general and performance based management in public administration the taxation of net wealth and financial transactions Out of Control Brian MacLean,1999 Financial market turmoil grabbed headlines in the nineties Many countries most notably in East Asia saw their currencies collapse and output plummet Economic shock waves from these crises hit Canada In this collection of essays distinguished contributors such as Linda McQuaig Jacques Parizeau and Douglas Peters go behind the headlines They explain the roots of international financial market turmoil and suggest reforms that will bring greater stability to the global economy and to the lives of the people who participate in it They assert that financial markets are inherently unstable and argue for strong regulation Out of Control offers clear headed analyses of the market turmoil of the 1990s and suggestions to minimize such volatility in future **The Political Economy of International Capital Mobility** M. Watson,2007-07-03 Matthew

Watson draws a distinction between the spatial and the functional mobility of capital allowing fresh insights into existing work on the subject whilst repoliticizing the very idea of capital being in motion The dynamics of capital mobility and the patterns of risk exposure are illustrated through four detailed global case studies Explorations in Financial Ethics Luc van Liedekerke,Jozef M. L. van Gerwen,Danny Cassimon,2000 The breakdown of Bretton Woods liberalised financial markets from extensive government control Increasing deregulation and technological innovation created truly global financial markets the perfect companions for global business and shareholder philosophy But this swift evolution did not occur without specific risks or accidents Financial crises surged at the slightest provocation causing havoc around the globe They were the painful reminders that the increasingly virtual abstract and remote world of finance still exerts a serious impact on our everyday life Is it because of their abstract nature that there hardly exists any systematic ethical reflection on the functioning of financial markets The present volume makes an attempt to fill this gap The authors question the efficiency of the financial system the present state of financial regulation the role of central bankers and the functioning of exchange and derivative markets This collection of essays represents the outcome of a three year research project at the Center for Ethics of the University of Antwerp UFSIA which has been executed by a multi disciplinary team of philosophers and economists

Global Public Policies and Programs Christopher D. Gerrard,Marco A. Danaher,2011-01-04 A veritable Globalization for Dummies 10 Reasons to Abolish the IMF World Banklays bare the most common myths of globalization in a clear and understandable way Looking with hope to grassroots movement building on a

global scale Danaher presents ten arguments for abolishing the IMF and World Bank and replacing them with democratic institutions that would make the global economy more accountable to an informed and active citizenry. Conceived as an effort to educate the public about how international institutions of free trade are widening the gap between the rich and poor globally, Danaher reveals how the lending policies of the IMF and the World Bank fail to benefit Third World peoples and instead line the pockets of undemocratic rulers and western corporations while threatening local democracies and forcing cuts to social programs. Through anecdotes, analysis, and innovative ideas, Danaher argues that the IMF and the World Bank undermine our most basic democratic values and calls for reframing the terms on which international economic institutions are operated using the principles of environmental sustainability, social justice, and human rights. *Life, Money and Illusion* Mike Nickerson, 2009-09-01 In recent years, unchecked growth has brought us to the brink of economic and environmental collapse. *Life, Money and Illusion* was inspired by the dilemma of having an economic structure that has to grow to remain healthy while facing the finite limits of our planet. This revised and updated edition launches a review of economic expansion. It examines how growth came to be a goal and how that goal, though once beneficial, is now the propellant for catastrophe. Then, by showing how the economy can be restructured to remain within planetary limits, it points the way to a sustainable future. *Life, Money and Illusion* advocates change by shifting the dominant economic paradigm from growth to sustainability. Techniques include measuring progress with social and environmental indicators along with economic ones; encouraging investment in community; practical changes such as full cost accounting, tax shifting, and monetary reform; honoring the Golden Rule instead of the Rule of Gold; focusing more on living than on stuff. An engaging and empowering vision of a future that celebrates humanity's extraordinary ability to adapt and evolve. *Life, Money and Illusion* will appeal to social activists, business people, students, environmentalists, financial planners, economists, parents, grandparents, and anyone else with a stake in the future. *Democratizing Global Governance* E. Aksu, J. Camilleri, 2002-07-15 Is globalization beyond human control? In this thought-provoking text, the myths and mantras of this apparently irresistible force are challenged and dissembled. By examining a number of fundamental questions, the contributors put forward a radical reform agenda for global governance. Can the global multilateral system be democratic? Are security and economic concerns separable? Can the development of a global civil society contribute to effective global governance? An important and wide-ranging study, this book will be essential reading for graduates and researchers in international relations. **Paper Boom** Jim Stanford, 1999-01-01 Preface and Acknowledgement Chapter 1 Introduction Lots of Money Not Enough Jobs Part I Money in Motion Investment and Job Creation Chapter 2 Money and Reality Canada's Two Economies Chapter 3 What Does th [The Economic North-South Divide](#) Kunibert Raffer, Hans Wolfgang Singer, 2002-01-01 This is a distinguished book written by two distinguished analysts of and commentators on the outcomes and processes that have dominated the evolution of the global economic order over the last sixty years. S. Subramanian *Journal of Social and Economic Development* What Raffer and Singer chose to do, they

have done very well indeed Saud Choudhry Development Policy Review Since the 1940s development thinking has been the subject of fierce debate and continual evolution The authors of this book trace the ideas that have driven changing approaches to development focusing also on the Prebisch Singer Thesis which seeks to explain the widening gaps between rich and poor nations caused by unequal distribution of trade benefits They discuss both aid during and after the cold war and the rise and subsequent liberalisation crisis of the Asian Tiger Economies The Economic North South Divide goes on to explore the structural roots of the debt crisis and considers the impact of debt management on North South economic relations exposing certain double standards that tilt global markets further against the South Encouraged by recent successful opposition to neoliberalism the authors finally propose ideas for a world where people seem to matter This book is a welcome addition to the debate and will appeal to anyone interested in economic development and history **Taming**

Administration David M. Boje,2008-09-01 The purpose of this book is to develop those ethical traditions For example Horkheimer s books Eclipse of Reason and Critique of Instrumental Reason and his early and now classic essay Materialism and Morality ask for a reformation of Kantian ethics The reform sought is that categorical imperative in an individualism capitalism serves to worsen the difference between business ethics and moral philosophy That is it is not enough to try to be good or ethical as individuals when it is the systemic processes that must be dealt with Therefore Horkheimer asks that the maxim that would be made universal be done at the level of people organizing with others to change the social system that is producing the unethical behaviors The book is organized into several sections The first section sets the stages beginning with a challenge to the field of social responsibility in business and public administration Jones Ten bos Parker have a new book out that is smashing Then we turn to Carr and to Zanettic who each have done critical theory work in public administration This is followed by Heather Hopfl who edited an issue on ethics of goodness and does the kind of writing that makes deep connections The next set of chapters make topic connections rhizomatics dialogics of co experience story narrative and postmodern The third set of topics focus on application technofuturist international business economics university environment accounting spirituality strategy and ending with Mills work on silence of race ethnicity in business and public administration ethics writing Money and Faith Michael Schut,2008-08-01 Talking about money in a personal way remains more of a taboo than sex or politics This seems odd within a Christian context since Jesus addressed topics of money poverty and wealth more than any other concerns For many money becomes an idol we see it in our own culture as we pursue

economic growth no matter the cost to the overall well being of God's creation When that happens enough is always more than we have right now and scarcity becomes the lens through which we see the world On a personal level this book opens up issues of scarcity and abundance idolatry and freedom on a societal level it invites exploration of greater equity and sustainability On both levels it empowers individuals and groups to apply their faith's values in practical ways while taking pastoral and prophetic stances The author suggests we need to experience the nurturing companionship of a wise compassionate pastor or spiritual guide in our relationship to money while also needing to experience the power strength anger and call to repentance of an Old Testament prophet People want to connect their values with everyday concerns while discovering ways to make a positive difference This book helps them do both Includes a comprehensive study guide within the book for groups and individuals Contributors include Henri Nouwen Dave Barry Walter Brueggemann David Boyle Lynne Twist Lewis Hyde William Stringfellow John Haughey Ched Myers Bill McKibben Sallie McFague William Greider Leonardo Boff Jean Bertrand Aristide Victoria Tauli Corpuz Maria Harris Rich Lang Wayne Muller Sharon Parks Rodney Clapp Ted Nace Lester Brown Pete Barnes Andy Loving Edgar Cahn Sarah Tarver Wahlquist Susan Wilkes Jim Klobuchar
