El Alimento:

El alimento, un ser vivo. Carolina Pérez, 2022-05-17 Esta publicación nos transmite el sentir de nuestros pueblos andinos sobre el alimento el recurso esencial de la gastronomía y los sistemas alimentarios. Aquí se reúnen los valiosos relatos de hombres y mujeres de Ecuador que mantienen viva la sabiduría de sus antepasados en su estrecha relación con los alimentos. Estos tesoros humanos vivos nos obsequian sus percepciones y conocimientos desde diferentes ámbitos como la cocina, la medicina andina, la academia, la educación y la agricultura, todos importantes para el desarrollo de un modelo de gastronomía con identidad y responsabilidad social y ambiental.

EL alimento y la vestimenta en el Islam Fahd Salem Bahammam, Exposición de las distintas situaciones relacionadas con los alimentos y la importancia de conocer lo que es lícito e ilícito de ellos. La relación entre la alimentación y la respuesta a las súplicas del musulmán. La etiqueta islámica del comer y el beber. Los reglamentos pertinentes a la vestimenta en el Islam y la explicación de las clases de vestimenta prohibida.

El alimento de los dioses H. G. Wells, 2021-10-19 Doscientos fícos despistados Redwood y Bensington con una misión en común encontrar el alimento perfecto la Heracleofobia que aumenta el tamaño de las criaturas que lo ingieren. Así nos encontramos con un escenario en que los pollos se vuelven tan grandes que se comen a los gatos, las ratas y avispas gigantes a los humanos, las plantas venenosas crecen tanto que resultan letales. Como consecuencia los bebés a los que acaba llegando este alimento se convierten en criaturas gigantes que se enfrentarán en una lucha a los pequeños humanos. El conflicto está servido y su desenlace es incierto aunque probablemente trágico en cualquier caso. Son historias entrelazadas a lo largo de los continentes y los siglos con cambios de tono la primera parte podría ser el escenario de una película de terror cuando las ratas salen a aterrorizar a los pueblerinos de la campiña inglesa la segunda tiene un tono de fábula con una crónica despiadada a la sociedad inglesa del momento mientras la tercera ocurre veinte años después con los cambios que ha traído este invento. Una vez más Wells demuestra ser un visionario que ya a principios del siglo XX se adelantaba al conflicto ético y moral que en nuestros días sigue despué s suscitando el debate sobre la modificación genética de los alimentos transgénicos. Y nos deja su habitual invitación a la reflexión acerca de la ética en los avances científicos y la moraleja el hombre no debe jugar a ser Dios ya que por muy noble que sea el propósito la ejecución siempre es llevada a cabo por hombres que tienen los defectos propios de la especie humana y por tanto el resultado puede ser catastrófico. Adaptada al cine en 1976 por Bert L. Gordon el resultado fue una película de serie B más bien mediocre que además prescinde de la parte más importante del relato y se centraba en un discurso ecologista característico de la época. H. G. Wells fue un reconocido escritor y biólogo inglés. Entre sus obras más reconocidas están La Maquinaria del Tiempo, La Guerra de los Mundos y La Isla del Dr. Moreau. Fue nominado cuatro veces al premio Nobel de Literatura y predijo el descubrimiento de aviones, tanques, viaje espacial y la televisión satelital años antes de su existencia.
