*Journal of the American Asiatic Association* ,1916 The Political Ideology of Hamas Michael Irving Jensen,2008-12-18 Hamas is typically portrayed in the West as nothing more than a terrorist organisation Yet as Michael Irving Jensen discovers it also provides medical clinics kindergartens schools elderly care and football training to the population of the West Bank and Gaza Using a combination of interviews and participant observation Jensen examines how these forms of social engagement relate to the organisation s official ideology which is still characterised by extremism and violence The Political Ideology of Hamas is the first attempt to provide a multidimensional picture of this organisation by looking at how it is perceived by the leadership the rank and file and the ordinary Palestinians who come into contact with it By comparing the

rhetoric of the leadership with the social reality Jensen opens up new ways of understanding Islamist movements in general

Architectural Design and Regulation Rob Imrie, Emma Street, 2011-01-21 From the earliest periods of architecture and building architects actions have been conditioned by rules regulations standards and governance practices These range from socio cultural and religious codes seeking to influence the formal structure of settlement patterns to prescriptive building regulations specifying detailed elements of design in relation to the safety of building structures In Architectural Design and Regulation the authors argue that the rule and regulatory basis of architecture is part of a broader field of socio institutional and political interventions in the design and development process that serve to delimit and define the scope of the activities of architects The book explores how the practices of architects are embedded in complex systems of rules and regulations The authors develop the understanding that the rules and regulations of building form and performance ought not to be counterpoised as external to creative processes and practices but as integral to the creation of well designed places The contribution of Architectural Design and Regulation is to show that far from the rule and regulatory basis of architecture undermining the capacities of architects to design they are the basis for new and challenging activities that open up possibilities for reinventing the actions of architects
