Laser Nick Taylor, 2002-01-09 The fascinating true story of Gordon Gould s successful thirty year struggle to assert himself as the rightful inventor of the laser and a myth shattering behind the scenes account of the American patent process The insight struck Gould with the force of revelation He sat bolt upright in bed marveling at its perfection Soon he was at his desk

writing at the top of a page in his laboratory notebook Some rough calculations on the feasibility of a Laser Light Amplification by Stimulated Emission of Radiation So began the invention of the laser in 1957 a machine that changed industry medicine and science and much of modern life Gordon Gould was a graduate student with a checkered past and a yen to invent but he had a blind spot when it came to patent rights And when a respected professor with an office next to Gould s electrified the scientific world with his own claims on the laser Gould was in for the fight of a lifetime For the next thirty years Gould battled the U S Patent Office and manufacturers to enforce his rights as the laser s inventor Rebuffed he was even denied security clearance to work on his own in

Beam : The Race to Make the Laser Jeff Hecht,2005-02-11 In 1954 Charles Townes invented the laser s microwave cousin the maser The next logical step was to extend the same physical principles to the shorter wavelengths of light but the idea did not catch fire until October 1957 when Townes asked Gordon Gould about Gould s research on using light to excite thallium atoms Each took the idea and ran with it The independent minded Gould sought the fortune of an independent inventor the professorial Townes sought the fame of scientific recognition Townes enlisted the help of his brother in law Arthur Schawlow and got Bell Labs into the race Gould turned his ideas into a patent application and a million dollar defense contract They soon had company Ali Javan one of Townes s former students began pulling 90 hour weeks at Bell Labs with colleague Bill Bennett And far away in California a bright young physicist named Ted Maiman became a very

dark horse in the race While Schawlow proclaimed that ruby could never make a laser Maiman slowly convinced himself it would As others struggled with recalcitrant equipment and military secrecy Maiman built a tiny and elegant device that fit in the palm of his hand His ruby laser worked the first time he tried it on May 16 1960 but afterwards he had to battle for acceptance as the man who made the first laser Beam is a fascinating tale of a remarkable and powerful invention that has become a symbol of modern technology **Amazing American Inventors of the 20th Century** Laura S.
