trail making it easy to track communication between different parties which is particularly useful in business environments where evidence might be required in case of legal disputes Despite its many advantages email has some limitations For instance it can be difficult to read emotions in emails leading to misunderstandings or misinterpretations of messages Moreover it is not very effective in situations that require immediate responses or when the sender is not sure if the recipient is actively checking their email Finally emails are vulnerable to hacking and phishing attacks which can result in unauthorized access to a user s account or loss of sensitive information Therefore users must be cautious when sending and receiving emails to ensure their accounts and information are secured
