Emotion As Meaning:

Components of emotional meaning Johnny J. R. Fontaine, Klaus R. Scherer, Cristina Soriano, 2013-08-01 Publications on emotion and the affective sciences in general have exploded in the last decade. Numerous research teams and individual scholars from many different disciplines have published research papers or books about many different aspects of emotions and their role in behaviour and society. However, one aspect of emotional research that has been somewhat neglected is the way in which emotional terms translate into other languages. When using terms like anger, sadness, fear, disgust, and joy for so-called basic emotions, as well as terms like shame, guilt, pride, regret, and contempt for more complex emotions, it is naturally assumed that the emotion terms used for research in the native language of the researchers and translated into English are completely equivalent in meaning. However, this is not generally the case. In many cases, there is no direct one-to-one relationship between an English term and a term in an alternative language. In fact, there can be significant differences in the way that these seemingly similar emotional terms can be applied across various languages, with important implications for how we review and appraise this work. This book presents an extensive cross-cultural and cross-linguistic review of the meaning of emotion words, adopting a novel methodological approach. Based on the Component Process Model, the authors developed a new instrument to assess the meaning of emotion terms. This instrument, the GRID questionnaire, consists of a grid of 24 emotion terms spanning the emotion domain and 142 emotion features that operationalize five emotion components: Appraisals, Bodily reactions, Expressions, Action tendencies, and Feelings. For the operationalization of these five emotion components, very different emotion models from the Western and the cultural comparative emotion literature were taken into account. Components of Emotional Meaning includes contributions from psychological, cultural, comparative, and linguistic perspectives, demonstrating how this new instrument can be used to empirically study very different research questions on the meaning of emotion terms. The implications of the results for major theoretical debates on emotion are also discussed. For all researchers in the affective sciences, this book is an important new reference work.

Metaphor and Emotion Zoltán Kövecses, 2003-09 Are human emotions best characterized as biological, psychological, or cultural entities? Many researchers claim that emotions arise either from human biology (i.e. biological reductionism) or as products of culture (i.e. social constructionism). This book challenges this simplistic division between the body and culture by showing how human emotions are to a large extent constructed from individuals' embodied experiences in different cultural settings. The view proposed here demonstrates how cultural aspects of emotions, metaphorical language about the emotions, and human physiology in emotion are all part of an integrated system and shows how this system points to the reconciliation of the seemingly contradictory views of biological reductionism and social constructionism in contemporary debates about human emotion.

Communicating Emotion Sally Planalp, 1999-08-13 The modern world is forcing us to understand emotion in order to cope with new problems such as road rage and epidemic levels of depression, as well as age-old problems such as

homicide genocide and racial tension At the same time scholarly research is leading us to appreciate how emotion helps us to understand and transcend our selfish interests to connect with others to feel what is just and moral and not just think it and to construct societies and cultures that govern our joint efforts This book draws upon scholarly research to address explain and legitimize the role that emotion plays in everyday interaction and in many of the pressing social moral and cultural issues that we face today

Emotion Concepts Zoltan Kövecses,2012-12-06 This chapter briefly describes the general goals of the book introduces the most fundamental features of the methodology that is employed to achieve these goals and gives an outline of the structure of the book A more detailed account of the goals and methodology is presented in chapters 2 and 3 respectively What the Book Is About The main objective of this study is to attempt to answer the question How do people understand their emotions As we shall see in the next chapter a large number of scholars have tried to provide answers to this question The interest in the way people understand their emotions has led scholars to the issue of the nature of emotion concepts and emotional meaning Since the notion of understanding involves or presupposes the notions of concept and meaning it was only natural for scholars with an interest in the way people understand their emotions to turn their attention to emotion concepts and the meaning associated with emotion terms So the broader issue has often become more specific For example Davitz in his *The Language of Emotion* formulated the central question in the following way What does a person mean when he says someone is happy or angry or sad Davitz 1969 1 *Everyday Conceptions of Emotion* J.A.

Russell,José-Miguel Fernández-Dols,Anthony S.R. Manstead,Jane C. Wellenkamp,2013-06-29 In *Everyday Conceptions of Emotion* prominent anthropologists linguists and psychologists come together for the first time to discuss how emotions are conceptualised by people of different cultures and ages speaking different languages Anger fear jealousy and emotion itself are concepts that are bound up with the English language embedded in a way of thinking acting and speaking At the same time the metaphors underlying such concepts are often similar across languages and children of different cultures follow common developmental pathways The book thus discusses the interplay of social and cultural factors that humans share in their development of an understanding of the affective side of their lives For researchers interested in emotion development of concepts and language cultural and linguistic influences on psychological processes *The Healing Power of Emotion*

Tan, 2013-10-16 Introduced one hundred years ago film has since become part of our lives For the past century however the experience offered by fiction films has remained a mystery Questions such as why adult viewers cry and shiver and why they care at all about fictional characters while aware that they contemplate an entirely staged scene are still unresolved In addition it is unknown why spectators find some film experiences entertaining that have a clearly aversive nature outside the cinema These and other questions make the psychological status of emotions allegedly induced by the fiction film highly problematic Earlier attempts to answer these questions have been limited to a few genre studies In recent years film criticism and the theory of film structure have made use of psychoanalytic concepts which have proven insufficient in accounting for the diversity of film induced affect In contrast academic psychology during the century of its existence has made extensive study of emotional responses provoked by viewing fiction film but has taken the role of film as a natural stimulus completely for granted The present volume bridges the gap between critical theories of film on the one hand and recent psychological theory and research of human emotion on the other in an attempt to explain the emotions provoked by fiction film This book integrates insights on the narrative structure of fiction film including its themes plot structure and characters with recent knowledge on the cognitive processing of natural events and narrative and person information It develops a theoretical framework for systematically describing emotion in the film viewer The question whether or not film produces genuine emotion is answered by comparing affect in the viewer with emotion in the real world experienced by persons witnessing events that have personal significance to them Current understanding of the psychology of emotions provides the basis for identifying critical features of the fiction film that trigger the general emotion system Individual emotions are classified according to their position in the affect structure of a film a larger system of emotions produced by one particular film as a whole Along the way a series of problematic issues is dealt with notably the reality of the emotional stimulus in film the identification of the viewer with protagonists on screen and the necessity of the viewer's cooperation in arriving at a genuine emotion Finally it is argued that film produced emotions are genuine emotions in response to an artificial stimulus Film can be regarded as a fine tuned machine for a continuous stream of emotions that are entertaining after all The work paves the way for understanding and in principle predicting emotions in the film viewer using existing psychological instruments of investigation Dealing with the problems of film induced affect and rendering them accessible to formal modeling and experimental method serves a wider interest of understanding aesthetic emotion the feelings that man made products and especially works of art can evoke in the beholder **The Science of the Emotions** Bhagavan Das, 1900 *The Language of Emotion* Joel R. Davitz, 2013-10-22 The Language of Emotion focuses on the inquiry on the language of emotion as well as the systematic description of the language used to describe emotional states The manuscript first offers information on the structure of emotional meaning including cluster analysis of items

patterning of clusters in emotional states and interrelationships among clusters The text then takes a look at comments on the structure of emotional meaning The publication examines studies on the language of emotion Discussions focus on a comparison of emotional experiences reported by adolescents in Uganda and the United States similarity of reported emotional experiences and genetic background individual differences in reported emotional experiences and perceptual cognitive style and development of the language of emotion The book is a vital reference for philosophers psychiatrists social workers and educators interested in emotional phenomena *Language and Emotion. Volume 2* Gesine Lenore Schiewer, Jeanette Altarriba, Bee Chin Ng, 2022-11-07 The handbook *Language and Emotion* is intended to give a historical and systematic profile of the area It will aim to connect contemporary and historical theories approaches and applications and to cover eastern and western perspectives of language communication and emotion It will present all relevant aspects of language and emotion and thus contribute significantly to research in the field of linguistics and semiotics of emotion The Evolution of Emotional Communication Eckart Altenmüller, Sabine Schmidt, Elke Zimmermann, 2013-01-24 Why do we think that we can understand animal voices such as the aggressive barking of a pet dog and the longing meows of the family cat Why do we think of deep voices as dominant and high voices as submissive Are there universal principles governing our own communication system Can we even see how close animals are related to us by constructing an evolutionary tree based on similarities and dissimilarities in acoustic signaling Research on the role of emotions in acoustic communication and its evolution has often been neglected despite its obvious role in our daily life When we infect others with our laugh soothe a crying baby with a lullaby or get goose bumps listening to classical music we are barely aware of the complex processes upon which this behavior is based It is not facial expressions or body language that are affecting us but sound They are present in music and speech as emotional prosody and allow us to communicate not only verbally but also emotionally This groundbreaking book presents a thorough exploration into how acoustically conveyed emotions are generated and processed in both animals and man It is the first volume to bridge the gap between research in the acoustic communication of emotions in humans with those in animals using a comparative approach With the communication of emotions being an important research topic for a range of scientific fields this book is valuable for those in the fields of animal behaviour anthropology evolutionary biology human psychology linguistics musicology and neurology **Scientific Constructive Democratic Self-Learning Classroom** Sk Habib, 2018-09-30 The book *Scientific Constructive Democratic Self Learning Classroom* arouses out of my experience as a member of Al Ameen Mission AACERT NEEV Wipro Applying Thought Disha India Education Foundation other The book reveals the fact that present constructive as well as destructive conditions of a state nation and the world are being happened mostly due to the poor performance of Teachers in their Elementary secondary Higher secondary College University s Classrooms Because we believe that future shapes in classroom So the book reveals the contents of The Present Observation Scenario of our country as well as world Life Centric Aims and Objectives of

Translation and Emotion Séverine Hubscher-Davidson, 2017-10-31 This volume tackles one of the most promising and interdisciplinary developments in modern Translation Studies the psychology of translation It applies the scientific study of emotion to the study of translation and translators in order to shed light on how emotions can impact decision making and problem solving when translating The book offers a new critical approach to the study of emotion in translation by analysing translators accounts of their experiences as well as drawing on a case study of emotional intelligence involving 155 professional translators The author identifies three distinctive areas where emotions influence translators emotional material contained in source texts their own emotions and the emotions of source and target readers In order to explore the relevance and influence of emotions in translation each chapter focuses on a different emotion trait emotion perception emotion regulation and emotion expression

Mixed Emotions Kay Milton, Marushka Svasek, 2020-08-28 Emotions are of increasing interest in all the human sciences In the past two decades a growing number of anthropologists have explored emotional dynamics in a variety of geographic and cultural settings and have developed various at times conflicting theories of emotion This book fills a major gap by providing a concise introduction to the anthropology of emotions that outlines some of the major themes and controversies Drawing on fieldwork undertaken in Europe Japan and Melanesia the authors explore how consciousness memory identity and politics are intimately related to emotional processes A broad range of case studies covers such topics as how fear is managed in Belfast how Spanish gypsies grieve and why Japanese tourists are drawn to monkey parks This book will be of interest to anyone seeking to understand the formative impact emotions have on culture and society in an increasingly globalized world

Methods and Assessment in Culture and Psychology Michael Bender, Byron G. Adams, 2021-02-18 Significant advancements in methodologies and statistical techniques in cross cultural psychological research abound but general practice education and most researchers in psychology rarely use them This leads to misinterpretations misrepresentations and prejudice The authors expertly demonstrate the importance of methodological rigor to safeguard appropriate inferences about similarities and differences particularly when methods have not been developed in the cultural contexts where they are used The book features acculturation and identity including contributions on remote acculturation religiosity and organizational contexts It also covers individual differences and evaluates methodological progress in educational assessment emotions motivation and personality Methodological and psychometric perspectives on equivalence and bias as well as measurement invariance in cross cultural research are a central theme From study design to data interpretation it is essential for psychology and the social sciences in general to adopt methods and assessment procedures that are more rigorous for culture comparative
