Emotions And Choice From Boethius To Descartes:

Emotions and Choice from Boethius to Descartes Henrik Lagerlund, Mikko Yrjönsuuri, 2012-12-06 As with almost all books this one took much longer to complete than we thought when we started It began within the research project Actions and Passions of the Mind from 1200 1700 which was financed by the Nordic Research Council in the Humanities NOS H between 1999 and 2001 but as the topic became clearer the book grew and the final product involves several people outside the original group in the NOS H project Many of the papers published here started as talks given at meetings of the project but no meeting resembles the finished book Indeed all the articles are in the end written just for this volume One of the overarching aims of the NOS H project was to highlight the continuity between medieval and modern philosophy of mind and as editors we also took this perspective when planning the volume The individual articles pertain to give an accurate and philosophically interesting treatment of the thinker or period they discuss but nonetheless the overall picture is one of continuity between not only medieval and early modern psychology of action but also between late ancient and medieval thinking on emotions and choice

Beatific Enjoyment in Medieval Scholastic Debates Severin Valentinov Kitanov, 2014-03-25 Beatific Enjoyment in Medieval Scholastic Debates examines the religious concept of enjoyment as discussed by scholastic theologians in the Latin Middle Ages Severin Kitanov argues that central to the concept of beatific enjoyment *fruitio beatifica* is the distinction between the terms enjoyment and use *frui et uti* found in Saint Augustine's treatise *On Christian Learning* Peter Lombard a twelfth century Italian theologian chose the enjoyment of God to serve as an opening topic of his *Sentences* and thereby set in motion an enduring scholastic discourse Kitanov examines the nature of volition and the relationship between volition and cognition He also explores theological debates on the definition of enjoyment whether there are different kinds and degrees of enjoyment whether natural reason unassisted by divine revelation can demonstrate that beatific enjoyment is possible whether beatific enjoyment is the same as pleasure whether it has an intrinsic cognitive character and whether the enjoyment of God in heaven is a free or un free act Even though the concept of beatific enjoyment is essentially religious and theological medieval scholastic authors discussed this concept by means of Aristotle's logical and scientific apparatus and through the lens of metaphysics physics psychology and virtue ethics Bringing together Christian theological and Aristotelian scientific and philosophical approaches to enjoyment Kitanov exposes the intricacy of the discourse and makes it intelligible for both students and scholars

Jesus and the God of Classical Theism Steven J. Duby, 2022-06-07 Christianity Today 2023 Book Award Academic Theology In both biblical studies and systematic theology modern treatments of the person of Christ have cast doubt on whether earlier Christian descriptions of God in which God is immutable impassible eternal and simple can fit together with the revelation of God in Christ This book explains how the Jesus revealed in Scripture comports with such descriptions of God The author argues that the Bible's Christology coheres with and even requires the affirmation of divine attributes like immutability impassibility eternity and simplicity

Sourcebook for the History of the Philosophy of Mind Simo Knuuttila, Juha Sihvola, 2013-10-23 Fresh translations of key texts exhaustive

coverage from Plato to Kant and detailed commentary by expert scholars of philosophy add up to make this sourcebook the first and most comprehensive account of the history of the philosophy of mind. Published at a time when the philosophy of mind and philosophical psychology are high profile domains in current research, the volume will inform our understanding of philosophical questions by shedding light on the origins of core conceptual assumptions often arrived at before the instauration of psychology as a recognized subject in its own right. The chapters closely follow historical developments in our understanding of the mind with sections dedicated to ancient, medieval, Latin and Arabic, and early modern periods of development. The volume's structural clarity enables readers to trace the entire progression of philosophical understanding on specific topics related to the mind such as the nature of perception. Doing so reveals the fascinating contrasts between current and historical approaches. In addition to its all-inclusive source material, the volume provides subtle expert commentary that includes critical introductions to each thematic section as well as detailed engagement with the central texts. A voluminous bibliography includes hundreds of primary and secondary sources. The sheer scale of this new publication sheds light on the progression and discontinuities in our study of the philosophy of mind and represents a major new sourcebook in a field of extreme importance to our understanding of humanity as a whole.

(Un)masking the Realities of Power, 2010-12-10. If Justus Lipsius's *Politica* of 1589 and its importance to the history of political thought needs no introduction, Lipsius's *Monita et exempla politica* 1605, conceived as a sequel to the *Politica*, has been overlooked time and again despite the fact that it is a unique key to understand the precise character of Lipsius's political thought. For is his widely read political dialogue a Neostoic discourse, or is it Tacitean/Machiavellian, or even anti-Machiavellian in nature? Did the work play such a pivotal role in the genesis of the modern centrally governed nation-state as some scholars tend to believe? This book collects essays by scholars from different disciplines and backgrounds. All of them endeavour to solve this apparent deadlock in scholarly research on Lipsius's political thought. All of them offer new and fascinating insights in the

genesis and developments of the nature and impact of political discourses in Early Modern Europe Feelings Transformed
Dominik Perler, 2018-10-10 What are emotions How do they relate to other mental states And what is their specific structure
This book discusses these questions focusing on medieval and early modern theories It pays particular attention to the
question of how we can change our emotions and thereby improve our mental life **Matter Matters** Kurt
Smith, 2010-04-29 Why is there a material world Why is it fundamentally mathematical Matter Matters explores a
seventeenth century answer to these questions as it emerged from the works of Descartes and Leibniz The mathematization
of the physics is shown to have been conceptually underwritten by two methods of philosophizing namely analysis and
synthesis The connection between these things mathematics matter and the methods of analysis and synthesis has thus far
gone unexplored by scholars The book is in four Parts Part I works out the context in which the theory of modern matter
arose Part II develops the method of analysis showing how it aligns with Descartes s famous doctrine of clear and distinct
ideas Part III develops the method of synthesis focusing primarily on Leibniz showing how it establishes the very conditions
necessary and sufficient for mathematics Analysis and synthesis turn out to establish isomorphic conceptual systems which
turn out to be isomorphic to what mathematicians today call a group The group concept expresses the conditions
underwriting all of mathematics Part IV examines several relatively new interpretations of Descartes the realist and idealist
readings which appear to be at odds with one another The examination shows the sense in which these readings are actually
compatible and together reveal a richer picture of Descartes s position on the reality of matter Ultimately Matter Matters
establishes the claim that mathematics is intelligible if and only if matter exists **Childhood in the Middle Ages and the
Renaissance** Albrecht Classen, 2011-12-22 Earlier theses on the history of childhood can now be laid to rest and a
fundamental paradigm shift initiated as there is an overwhelming body of evidence to show that in medieval and early
modern times too there were close emotional relations between parents and children The contributors to this volume
demonstrate conclusively on the one hand how intensively parents concerned themselves with their children in the pre
modern era and on the other which social political and religious conditions shaped these relationships These studies in
emotional history demonstrate how easy it is for a subjective choice of sources coupled with faulty interpretations caused
mainly by modern prejudices toward the Middle Ages in particular to lead to the view that in the past children were regarded
as small adults The contributors demonstrate convincingly that intense feelings admittedly often different in nature shaped
the relationship between adults and children
