**Empathic Leadership** Peter Sear, 2023-05-19

Empathic leadership has become popular across industries including the challenging domain of elite sport. This book draws on the author's relevant research and experience and incorporates the words of leaders of teams to help to explain how empathy can help leaders to be successful in their work. Seven aspects of empathy are described in detail, each illustrated with fascinating stories from male and female head coaches of teams competing at the highest levels of nine different team sports. The result is an authentic portrayal of what it takes to become an empathic leader. Exploring the philosophies and practices of empathic leadership, attention is paid to a range of important factors within leadership including relationship management, building trust and establishing a strong line of communication. This book also focuses on the importance of self-empathy as a starting point of empathic leadership, providing readers with the ways to understand their own emotions and deep thoughts and how they impact their leadership approach. Through this model, the author demonstrates how applying empathy in both work and life will enhance wellbeing, bring people together and make leaders more influential and popular. This book will be of interest to coaches in sport training organisations including national governing bodies, recruiters, leaders across all industries and anyone interested in the role of empathy in professional relationships.

*Empathy, Normalization and De-escalation* Massimo Biondi, Massimo Pasquini, Lorenzo Tarsitani, 2021-01-28. This book describes theory and techniques of empathic communication, normalization and de-escalation procedures for the management of aggressive or violent patients in clinical critical settings. Consisting of 9 chapters, it discusses in detail the self-regulation of empathy in potential dangerous interactions as well as common mistakes and nonprofessional reactions. It also explores the basic concept of neurobiology of violence and aggression behaviour such as brain circuitry and neuromodulators and other rapid tranquillization guidelines. The final chapter focuses on the crucial topics of post-aggression debriefing. Based on the clinical experience of the editors and authors who work in emergency psychiatry settings, the book offers practical key expressions to promote a normalization talk to calm agitated individuals and to prevent crises both for psychiatric patients and people without mental disorders. It is a useful tool to help readers gain confidence as mediators in critical circumstances and will be of interest for a wide range of practitioners in healthcare settings from psychiatrists and psychologists to nurses and other healthcare workers.
