Longman Companion to the Formation of the European Empires, 1488-1920 Muriel E. Chamberlain, 2014-06-11
The European empires as they existed from the Age of Discovery until after the First World War shaped the modern world So great has been their political economic and cultural influence that to fully understand contemporary history and events it is essential to have an understanding of the imperial past This book is an impressive achievement It brings together in one comprehensive volume all the essential facts and figures relating to the process of empire building by the European powers It complements the Longman Companion to European Decolonisation in the Twentieth Century by the same author together they help to explain why different empires had different philosophies dissolved in different ways and left different legacies

Empires of the Senses Andrew J. Rotter, 2019-06-21 When encountering unfamiliar environments in India and the Philippines the British and the Americans wrote extensively about the first taste of mango and meat spiced with cumin the smell of excrement and coconut oil the feel of humidity and rough cloth against skin the sound of bells and insects and the appearance of dark skinned natives and lepers So too did the colonial subjects they encountered perceive the agents of empire through their senses and their skins Empire of course involved economics geopolitics violence a desire for order and greatness a craving for excitement and adventure It also involved an encounter between authorities and subjects an everyday process of social interaction political negotiation policing schooling and healing While these all concerned what people thought about each other perceptions of others as Andrew Rotter shows were also formed through seeing hearing touching smelling and tasting In this book Rotter offers a sensory history of the British in India from the formal imposition of their rule to its end 1857 1947 and the Americans in the Philippines from annexation to independence 1898 1946 The British and the Americans saw themselves as the civilizers of what they judged backward societies and they believed that a vital part of the civilizing process was to properly prioritize the senses and to ensure them against offense or affront Societies that looked shabby were noisy and smelly felt wrong and consumed unwholesome food in unmannerly ways were unfit for self government It was the duty of allegedly more sensorily advanced Anglo Americans to educate them before formally withdrawing their power Indians and Filipinos had different ideas of what constituted sensory civilization and to some extent resisted imperial efforts to impose their own versions What eventually emerged were compromises between these nations sensory regimes A fascinating and original comparative work Empires of the Senses offers new perspectives on imperial history *University of Wisconsin Studies in the Social Sciences and History* University of Wisconsin, 1928 *University of Wisconsin Studies in the Social Sciences and History*, 1928 *The SAGE Encyclopedia of Filipina/x/o American Studies*

Vaughn,Robert A. Olwell,2019-11-28 Examining the pivotal period between the end of the Seven Years War and the dawn of the American Revolution Envisioning Empire reinterprets the development of the British Empire in the 18th century With exceptional geographical scope this book provides new ways of understanding the actors and events in many imperial arenas including West Africa North America the Caribbean and South Asia While 1763 has long been seen as marking a turning point in British and British colonial history Envisioning Empire treats this epochal year and the decade that followed as constituting a discrete moment in Imperial history that is significant in its own right Exploring the programs and plans that sought to incorporate the vast new territories and millions of new subjects into the British state and imperial system it demonstrates how the period between the end of the Seven Years War and the beginning of the American Revolution was one of contested ideas about the future of British overseas expansion By examining these competing imperial visions and designs from the perspective of Britain s new subjects as well as from that of British ministers Envisioning Empire both illuminates and complicates the boundaries that have been drawn between the first and second British empires and reveals how the Empire was being conceived discussed and debated during an era of rapid transformation **The Struggle for Sea Power: A Naval History of the American Revolution** Sam Willis,2016-02-15 A fascinating naval perspective on one of the greatest

of all historical conundrums How did thirteen isolated colonies which in 1775 began a war with Britain without a navy or an army win their independence from the greatest naval and military power on earth The American Revolution involved a naval war of immense scope and variety including no fewer than twenty two navies fighting on five oceans to say nothing of rivers and lakes In no other war were so many large scale fleet battles fought one of which was the most strategically significant naval battle in all of British French and American history Simultaneous naval campaigns were fought in the English Channel the North and Mid Atlantic the Mediterranean off South Africa in the Indian Ocean the Caribbean the Pacific the North Sea and of course off the eastern seaboard of America Not until the Second World War would any nation actively fight in so many different theaters In The Struggle for Sea Power Sam Willis traces every key military event in the path to American independence from a naval perspective and he also brings this important viewpoint to bear on economic political and social developments that were fundamental to the success of the Revolution In doing so Willis offers valuable new insights into American British French Spanish Dutch and Russian history This unique account of the American Revolution gives us a new understanding of the influence of sea power upon history of the American path to independence and of the rise and fall of the British Empire
