The Encyclopedia of New York State Peter Eisenstadt,2005-05-19 The

Encyclopedia of New York State is one of the most complete works on the Empire State to be published in a half century. In nearly 2 000 pages and 4 000 signed entries this single volume captures the impressive complexity of New York State as a historic crossroads of people and ideas as a cradle of abolitionism and feminism and as an apex of modern urban suburban and rural life. The Encyclopedia is packed with fascinating details from fields ranging from sociology and geography to history. Did you know that Manhattan's Lower East Side was once the most populated neighborhood in the world but Hamilton County in the Adirondacks is the least densely populated county east of the Mississippi? New York is the only state to border both the Great Lakes and the Atlantic Ocean; the Erie Canal opened New York City to rich farmland upstate and to the west. Entries by experts chronicle New York's varied areas, politics and persuasions with a cornucopia of subjects from environmentalism to higher education to railroads, weaving the state's diverse regions and peoples into one idea of New York State. Lavishly illustrated with 500 photographs and figures, 120 maps and 140 tables, the Encyclopedia is key to understanding the state's past, present and future. It is a crucial reference for students, teachers, historians and business people for New Yorkers of all persuasions and for anyone interested in finding out more about New York State.

My River Chronicles Jessica DuLong, 2009-09-08 After journalist Jessica DuLong was laid off from her dot com job, her life took an unexpected turn. A volunteer day aboard an antique fireboat, the John J. Harvey, led to a job in the engine room where she found a taste of home she hadn't realized she was missing. Working with the boat's finely crafted machinery on the waters of the storied Hudson made her wonder what America is losing in our shift away from hands-on work. Her questions crystallized after she and her crew served at Ground Zero where fireboats provided the only water available to fight blazes. Vivid and immediate, *My River Chronicles* is a journey with an extraordinary guide, a mechanic's daughter and Stanford graduate who bridges blue collar and white collar worlds, turning a phrase as deftly as she does a wrench. As she searches for the meaning of work in America, DuLong shares her own experiences of learning to navigate a traditionally male world masterfully interweaving unforgettable present-day characters and events with four centuries of Hudson River history. A celebration of craftsmanship, *My River Chronicles* is a deeply personal story of a unique woman's discovery of her own roots and America's that raises important questions about our nation's future.

Behind the Scenes Robert Alexander Wardhaugh, Douglas MacEwan, 2010-01-01 Robert A. Wardhaugh chronicles Clark's contributions to Canada's modern state in *Behind the Scenes*, which reconstructs the public life and ideas of one of Canada's most important bureaucrats.

Boyer, Melvyn Dubofsky, 2001 In this volume that is as big and as varied as the nation it portrays, are over 1 400 entries written by some 900 historians and other scholars illuminating not only America's political, diplomatic and military history but also social, cultural and intellectual trends, science, technology and medicine, the arts and religion.

Higher Neal Bascomb, 2004-09-21 The Roaring Twenties in New York was a time of exuberant ambition, free flowing optimism, an explosion of artistic expression in the age of Prohibition. New York was the city that embodied the spirit

and strength of a newly powerful America In 1924 in the vibrant heart of Manhattan a fierce rivalry was born Two architects William Van Alen and Craig Severance former friends and successful partners but now bitter adversaries set out to imprint their individual marks on the greatest canvas in the world the rapidly evolving skyline of New York City Each man desired to build the city s tallest building or skyscraper Each would stop at nothing to outdo his rival Van Alen was a creative genius who envisioned a bold contemporary building that would move beyond the tired architecture of the previous century By a stroke of good fortune he found a larger than life patron in automobile magnate Walter Chrysler and they set out to build the legendary Chrysler building Severance by comparison was a brilliant businessman and he tapped his circle of downtown old money investors to begin construction on the Manhattan Company Building at 40 Wall Street From ground breaking to bricklaying Van Alen and Severance fought a cunning duel of wills Each man was forced to revamp his architectural design in an attempt to push higher to overcome his rival in mid construction as the structures rose floor by floor in record time Yet just as the battle was underway a third party entered the arena and announced plans to build an even larger building This project would be overseen by one of Chrysler s principal rivals a representative of the General Motors group and the building ultimately became known as The Empire State Building Infused with narrative thrills and perfectly rendered historical and engineering detail Higher brings to life a sensational episode in American history Author Neal Bascomb interweaves characters such as Al Smith and Governor Franklin Delano Roosevelt leading up to an astonishing climax that illustrates one of the most ingenious and secret architectural achievements of all time

Impossible Heights Adnan Morshed, 2015-01-15 The advent of the airplane and skyscraper in the 1920s and 30s offered America the population an entirely new way to look at the world from above. The captivating image of an airplane flying over the rising metropolis led many Americans to believe a new civilization had dawned. In *Impossible Heights*, Adnan Morshed examines the aesthetics that emerged from this valorization of heights and their impact on the built environment. The lofty vantage point from the sky ushered in a modernist impulse to cleanse crowded twentieth-century cities in anticipation of an ideal world of tomorrow. Inspired by great new heights, American architects became central to this endeavor and were regarded as heroic aviators. Combining close readings of a broad range of archival sources, Morshed offers new interpretations of works such as Hugh Ferriss's *Metropolis*, drawings by Buckminster Fuller's Dymaxion houses, and Norman Bel Geddes's *Futurama* exhibit at the 1939 New York World's Fair. Transformed by the populist imagination into master builders, these designers helped produce a new form of visuality: the aesthetics of ascension. By demonstrating how aerial movement and height intersect with popular Superman discourses of the time, Morshed reveals the relationship between architecture, art, science, and interwar pop culture. Featuring a marvelous array of never-before-published illustrations, this richly textured study of utopian imaginings illustrates America's propulsion into a new cultural consciousness.

The Building as Screen Dave Colangelo, 2025-10-01 *The Building as Screen: A History, Theory, and Practice of Massive Media* describes, historicizes, theorizes, and creatively deploys massive media: a set of techno-social assemblages and practices that include large outdoor projections, programmable architectural facades, and urban screens in order to better understand their critical and creative potential. Massive media is named as such not only because of the size and subsequent visibility of this phenomenon but also for its characteristic networks and interactive, screen- and cinema-like qualities. Examples include the programmable lighting of the Empire State Building and the interactive projections of Montreal's Quartier des spectacles, as well as a number of works created by the author himself. This book argues that massive media enables and necessitates the development of new practices of expanded cinema, public data visualization, and installation art and curation that blend the logics of urban space, monumentality, and the public sphere with the aesthetics and affordances of digital information and the moving image.
