James Hammerton, Alistair Thomson, 2005-08-06. More than a million Britons emigrated to Australia between the 1940s and 1970s. They were the famous ten pound Poms, and this is their story. Illuminated by the fascinating testimony of migrant life histories, this is the first substantial history of their experience and fills a gaping hole in the literature of emigration. The authors, both leading figures in the fields of oral history and migration studies, draw upon a rich life history archive of letters, diaries, personal photographs, and hundreds of oral history interviews with former migrants, including those who settled in Australia and those who returned to Britain. *SS Nieuw Amsterdam* William H. This inspiring book shows how the spiritual side of life, with its thoughts, feelings, and aspirations, is intimately bound up with our material technologies. From the wonder of Gothic Cathedrals to the quiet majesty of lighter-than-air flight to the ultimate in luxury of the north Atlantic steamers, Peter Hancock explores how these sequential heights of technology have enabled our dreams of being transported to new and uncharted realms to become reality. Sometimes literally, sometimes figuratively, technology has always been there to make material the visions of our imagination. This book shows how this has essentially been true for all technologies, from Stonehenge to space station. But technology is far from perfect. Indeed, the author argues here that some of the most public and tragic of its failures still remain instructive, emblematic, and even inspiring. He reports on examples such as a Cathedral of

the Earth Beauvais a Cathedral of the Seas Titanic and a Cathedral of the Air Hindenburg and tells their stories from the viewpoint of material transcendence By interweaving their stories he reveals how technologies can succeed in elevating human beings and in taking them to whole new realms of being he explores and explains why these experiences are Transports of Delight      *Consumer Behavior in Travel and Tourism* Kaye Sung Chon, Abraham Pizam, Yoel Mansfeld, 2012-10-12 Containing original and previously unpublished theoretical and empirical studies *Consumer Behavior in Travel and Tourism* will give professionals professors and researchers in the field up to date insight and information on trends happenings and findings in the international hospitality business arena A great resource for educators this book is complete with learning objectives concept definitions and even review questions at the end of each chapter From this book readers will understand and learn the needs and preferences of tourists and how to investigate the process of destination and product selection to help provide customers with products and services that will best meet their needs In today s highly competitive business environment understanding travel behavior is imperative to success *Consumer Behavior in Travel and Tourism* brings together several studies in one volume representing the first attempt to explore define analyze and evaluate the consumption of tourist and travel products This guide offers essential research strategies and methods that enables readers to determine the wants and needs of tourists including discussing and evaluating the main factors that affect consumer behavior in travel and tourism such as travel motivation destination choice and the consequent travel behavior exploring the various decision making processes of consumers that leads to consequent destination choices through case study analysis and marketing suggestions determining customer expectations of products through a variety of research techniques in order to find ways of improving satisfaction examining selected research tools such as product positioning and repositioning and using perceptual maps to evaluate the market implications of using qualitative and or quantitative research techniques detecting and analyzing the relative roles individual environmental socioeconomic and demographic factors play in choosing travel destinations Full of detailed charts and graphs *Consumer Behavior in Travel and Tourism* illustrates key points to give you a better understanding of important facts and findings in the field      **Log of Logs** Ian Hawkins Nicholson, 1990      **Along the Hudson** William H. Miller, 2012-07-15 The glamour age of ocean liner travel was the 1950s Nothing could compete with the ocean liner and huge profits were made by the shipping lines William H Miller tells the story of Luxury Liner Row in this Golden Age      Ocean Liners Anthony Burton, 2024-07-30 There has always been a romance around ocean liners but this book looks behind the romance to show the reality of travelling the oceans of the world The book starts with the first scheduled transatlantic crossings in the age of sail then moves on through the development of the steamers and ends in the present day when ocean liners have given way to airliners All aspects of the subject are discussed The experience of travelling by sea varied enormously from the luxury of first class travel to the often brutal conditions endured by immigrants Ship design developed in the race between competing companies to provide the most powerful ships

But while technology came into the fundamental design when it came to decor for many of the great liners the interiors looked back with a romanticised view of the past It is not always realised that a great liner might have almost as many crew as passengers and this looks at all those who kept the ships running from the black gang in the engine room to the captain on the bridge The result is a rounded view of what it meant to travel on some of the greatest ships ever built
