American Workers, Colonial Power Dorothy B. Fujita Rony, 2003-03-04 Historically Filipina o Americans have been one of the oldest and largest Asian American groups in the United States In this pathbreaking work of historical scholarship Dorothy B Fujita Rony traces the evolution of Seattle as a major site for Philippine immigration between World Wars I and II and examines the dynamics of the community through the frameworks of race place gender and class By positing Seattle as a colonial metropolis for Filipina os in the United States Fujita Rony reveals how networks of transpacific trade and militarism encouraged migration to the city leading to the early establishment of a Filipina o American community in the area By the 1920s and 1930s a vibrant Filipina o American society had developed in Seattle creating a culture whose members including some who were not of Filipina o descent chose to pursue options in the U S or in the Philippines Fujita Rony also shows how racism against Filipina o Americans led to constant mobility into and out of Seattle making it a center of a thriving ethnic community in which only some remained permanently given its limited possibilities for employment The book addresses class distinctions as well as gender relations and also situates the growth of Filipina o Seattle within the regional history of the American West in addition to the larger arena of U S Philippines relations

The Philippines David Joel Steinberg, 2018-02-19 A unified nation with a single people the Philippines is also a highly fragmented plural society Divided between uplander and lowlander rich and poor Christian and Muslim between those of one ethnic linguistic and geographic region and those of another the nation is a complex mosaic formed by conflicting forces of consensus and national identity and of division and instability It is not possible to comprehend the many changes in the Philippines such as the rise and fall of Ferdinand Marcos or the revolution that toppled him without an awareness of the religious cultural and economic forces that have shaped the history of these islands These forces formed the focus of the first edition of *The Philippines* Of that 1982 edition the late Benigno Aquino Jr noted that anyone wanting to understand the Philippines and the Filipinos today must include this book in his must reading list The fourth edition has been updated through the final years of the Ramos presidency and contains a new section on the impact of President Estrada

Philippine Studies , 1989 **Worlds in Motion : Understanding International Migration at the End of the Millennium** Douglas S. Massey, Joaquin Arango, Graeme Hugo, Ali Kouaouci, Adela Pellegrino, 1999-01-28 At the end of the 20th century nearly all developed nations have become countries of immigration absorbing growing numbers of immigrants not only from developed regions but increasingly from developing nations of the Third World Although international migration has come to play a central role in the social economic and demographic dynamics of both immigrant sending and immigrant receiving countries social scientists have been slow to construct a comprehensive theory to explain it Efforts at theoretical explanation have been fragmented by disciplinary geographic and methodological boundaries *Worlds in Motion* seeks to overcome these schisms to create a comprehensive theory of international migration for the next century After explicating the various propositions and hypotheses of current theories and identifying areas of complementarity and conflict the authors review empirical research emanating from each of the world s principal international migration systems North

America Western Europe the Gulf Asia and the Pacific and the Southern Cone of South America Using data from the 1980s levels and patterns of migration within each system are described to define their structure and organization Specific studies are then comprehensively surveyed to evaluate the fundamental propositions of neoclassical economics the new economics of labour migration segmented labour market theory world systems theory social capital theory and the theory of cumulative causation The various theories are also tested by applying them to the relationship between international migration and economic development Although certain theories seem to function more effectively in certain systems all contain elements of truth supported by empirical research The task of the theorist is thus to identify which theories are most effective in accounting for international migration in the world today and what regional and national circumstances lead to a predominance of one theoretical mechanism over another The book concludes by offering an empirically grounded theoretical synthesis to serve as a guide for researchers and policy makers in the 21st century **Islanders in the Empire**
