Stephen Hawking John Gribbin, 2016-01-15 Stephen Hawking is no ordinary scientist Perhaps more than any other scientist he has broadened our basic understanding of the universe His theoretical work on black holes and the origins and nature of the cosmos have been groundbreaking if not downright revolutionary He has also spent much of his adult life confined to a wheelchair a victim of ALS But his physical limitations have done nothing to confine him intellectually or hinder his scientific development Hawking would already be remarkable for his cutting edge work in theoretical physics alone However he has also managed to popularize science unlike any one else Today he is a household name and achieved almost cult like fame with the release of *A Brief History of Time* Although this book is steeped in the complexities of cosmology millions of people were eager to learn just some of what he had to offer Science writers White and Gribbin have painted a compelling portrait of a scientific mind that seemingly knows no bounds Weaving together clear explanations of Hawking's science with a detailed balanced and sensitive personal history we come to know and appreciate both sides of this incredible man Includes new updates in Hawking's biography and the recent discovery of the Higgs Boson or God particle

[James Clerk Maxwell](#) Raymond Flood, Mark McCartney, Andrew Whitaker, 2014 James Clerk Maxwell 1831-1879 was one of the most important mathematical physicists of all time In scientific terms his immortality is enshrined in electromagnetism and Maxwell's equations but as this book shows there was much more to Maxwell than electromagnetism both in terms of his science and his wider life
