Vision, Technology, and Subjectivity in Mexican Cyberpunk Literature

Stephen C. Tobin,2023-07-06 Vision Technology and Subjectivity in Mexican Cyberpunk Literature interrogates an array of cyberpunk and post cyberpunk science fiction novels and short stories from Mexico whose themes engage directly with visual technologies and the subjectivities they help produce all published during and influenced by the country s neoliberal era This book argues that television computers and smartphones and the literary narratives that treat them all correspond to separate yet overlapping scopic regimes within the country today Amidst the shifts occurring in the country s field of vision during this period the authors of these cyberpunk and post cyberpunk narratives imagine how these devices contribute to producing specular subjects or subjects who are constituted in large measure by their use and interaction with visual technologies In doing so they repeatedly recur to the posthuman figure of the cyborg in order to articulate these changes Stephen C Tobin therefore contends that the literary cyborg becomes a discursive site for working through the problematics of sight in Mexico during the globalized era In all these specular fictions represent an exceptional tendency within literary expression especially within the cyberpunk genre that grapples with themes and issues regarding the nature of vision being increasingly mediated by technology
