graduate education courses *LSAT Reading Comprehension Made Easy* Merrill Edgar Rotich, Reading the Bible in an Age of Crisis Bruce Worthington, 2015 We live in an age in which economic ecological and political crises are not the exception but the rule The Cold War polarities that shaped an earlier political exegesis have been replaced Bruce Worthington argues that increasingly crisis is the engine of a global turbo capitalism In this volume edited by Worthington biblical scholars and activists describe and exemplify the shape of a biblical interpretation that takes contemporary crisis seriously as its most important context Succinct opening essays summarize the salient aspects of our critical situation especially in relation to the dominance of capitalism and its pervasive values in later parts contributions address themes of economic political and environmental crisis in dialogue with texts from the First and Second Testaments Throughout the volume the authors are careful to describe the basis for making interpretive analogies across historical cultural and socioeconomic distances between the world of the Hebrew Bible the New Testament and our own Richard A Horsley writes a postscript pointing to next steps in political interpretation Urban Society and Monastic Lordship in Reading, 1350-1600 Joe Chick, 2022 Interrogates the standard view of turbulent and violent town abbey relations through a combination of traditional and new research techniques The power of the medieval Church stretched far beyond the religious sphere Bishops and monasteries held lordship over vast areas of the realm often wielding political and judicial powers beyond those of secular lords Early twentieth century scholarship tended to view towns with monastic lords as highly distinctive characterised by robust lordship and violent town abbey relations and though subsequent studies have done much to modify this view of relationships between towns and their monastic lords the shadow of this dramatic interpretation still colours our understanding of these situations Conversely through a detailed examination of the governmental guild parish and testamentary records of Reading one of the more populous monastic towns of the period this book presents a view of town abbey relations as largely non violent thus problematising the more traditional characterisation and interrogating its universality Uncovering a remarkably swift transition from monastic lordship to self government it illuminates how urban society functioned under two very different regimes both before and after the dissolution of the monasteries By combining traditional research methods with Social Network Analysis the author moves beyond a focus on the political elites and institutionalised bodies such as the corporation to look at lower status members of society and how they interacted with the successive governing authorities In particular it investigates what continuities and changes to local governance they experienced during this turbulent period **Reading Asia** Frans Husken Huskin, Dick van der Meij, 2013-10-11 This volume presents a wide variety of articles in the broad field of Asian Studies covering the latest results of research within the social sciences and the humanities reflecting the rich diversity within these areas of research The contributions stem from research carried out by scholars who are or have been affiliated with the International Institute for Asian Studies Leiden Amsterdam

Engineering and Contracting, 1920 **Politicians' Reading of Public Opinion and its Biases** Stefaan Walgrave, Karolin Soontjens, Julie Sevenans, 2022-08-15 Examining a central assumption widely accepted as being crucial in making democracy work that politicians form a more or less accurate image of public opinion and take that perception into account when representing citizens Politicians Reading of Public Opinion and its Biases presents a paradox of representation On the one hand politicians invest enormously in reading public opinion They are committed to finding out what the people want and public opinion is a key consideration in many of their undertakings Yet on the other hand politicians' perceptions of public opinion are surprisingly inaccurate Politicians are hardly better at estimating public opinion than ordinary citizens are Their perceptions are distorted by social projection in the sense that politicians' own opinion affects their estimations and on top of that there seems to be a systematic right wing bias in these perceptions The findings imply that one of the main paths to responsive policy making is flawed Even though politicians do the best they can to learn about people's preferences skewed perceptions put them on the wrong track From a democratic perspective the central findings of the book are quite sobering The high hopes that many authors had with regard to politicians' ability to adequately consult or sense public opinion appear to be vain The book puts forward a plausible driver of the slippage between the public and politics Politicians are less responsive to people's preferences than they could be not because they do not want to be responsive but because they base themselves on erroneous public opinion perceptions
