*Economics of Transport* Thomas Thorburn, 2000      **Return Migration from Sweden 1968-1996** Martin Klinthäll, 2003

Christer Lundh, 2004 Wage formation is a central element in economic growth and economic transformation The point of departure of this book is the reciprocal nature of the relation between the economy and the labor market On one hand technological and economic change cause changes in labor market institutions but on the other hand the wage formation system is of utmost importance to the economic development Thus the focus of analysis is the relationship between long term structural transformation of the economy and labor market institutions in Sweden during the nineteenth and twentieth centuries From this perspective the following topics are addressed economic change and income distribution regional wages and the wage differentials in industry technology institutions and wage structure wage formation systems and labor market institutions unemployment policy vocational education flexible working time The authors are all senior researchers in economic history at Lund University      *Innovations and Industrial Performance in Finland, 1945-1998* Jani Saarinen, 2005

**International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences**, 2000      **Peasant Production and Limits to Labour** Erik Green, 2005

The persistence of a low productive peasant sector in sub Saharan Africa is one of the enigmas of development research Green approaches this crucial question by analysing the paths of agrarian change in two contrasting cases in Malawi from the mid 1930s to the late 1970s The two cases Thyolo and Mzimba districts with their differences in terms of population density infrastructure and environmental contexts are compared with a focus on changes in agricultural production and farming systems      *Immigrant Employment Integration and Structural Change in Sweden, 1970-1995* Pieter Bevelander, 2000

**Does Schooling Make Sense** Mattias Lindgren, 2005 Egypt is a country that has been characterised by a low and unequal educational attainment although great progress has been made Studies on the return to education in the country for salaried labour have indicated that the country also has been characterised by relatively low returns This thesis utilises the 1997 Egypt Integrated Household Survey to see to what extent the picture of low returns remains if we broaden and refine the analysis along the lines indicated above We also examine the factors in the recent Egyptian history that can explain the observed pattern as well as speculate on to what extent the pattern can explain development in the schooling attainment
