Medieval Philosophy John Marenbon, 2003 This volume provides a scholarly introduction to authors and issues involved in the philosophical discourse of the medieval era *The Cambridge History of Philosophy in Late Antiquity* Lloyd P. Gerson, 2015-12-10 The Cambridge History of Philosophy in Late Antiquity comprises over forty specially commissioned essays by experts on the philosophy of the period 200-800 CE Designed as a successor to The Cambridge History of Later Greek and Early Medieval Philosophy edited by A H Armstrong it takes into account some forty years of scholarship since the publication of that volume The contributors examine philosophy as it entered literature science and religion and offer new and extensive assessments of philosophers who until recently have been mostly ignored The volume also includes a complete digest of all philosophical works known to have been written during this period It will be an invaluable resource for all those interested in this rich and still emerging field *La crue de l'aristotélisme (suite)* Pierre Maurice Marie Duhem, 1917 **Le système du monde: La crue de l'aristotélisme (suite)** Pierre Maurice Marie Duhem, 1917 *B. Systematic philosophy. C. Logic. D. Aesthetics. E. Philosophy of religion. F. Ethics. G. Psychology*, 1905 **Philosophy and Learning** Maarten Hoenen, Schneider, Wieland, 2021-09-20 The history of universities has long been an object of scholarly research Nonetheless the proposed questions and themes have too often been handled in isolation The present collection divided into three thematic sections attempts to connect subjects which are bound together in the context of the idea of the university and the course of its historical realization The first section concentrates on the rational process which characterized the development of the university Section two is devoted to the relationship between the organizational forms of the university and the literary forms of university texts Section three concerns itself with the differentiation and institutionalization of schools of thought in the later Middle Ages The volume contains fourteen studies resulting from new and original research and concludes with an extensive bibliography **The Philosophy of Peter Abelard** John Marenbon, 1997 This book offers a major reassessment of

the philosophy of Peter Abelard 1079-1142 which shows that he was a far more constructive and wider ranging thinker than has usually been supposed. It combines detailed historical discussion based on published and manuscript sources with philosophical analysis which aims to make clear Abelard's central arguments about the nature of things, language and the mind and about morality. Although the book concentrates on these philosophical questions it places them within their theological and wider intellectual context.

The Dutch Legacy: Radical Thinkers of the 17th Century and the Enlightenment Sonja Lavaert, Winfried Schröder, 2016-11-01. While Spinoza's impact on the early Enlightenment has always found due attention of historians of philosophy, several 17th century Dutch thinkers who were active before Spinoza's *Tractatus theologico politicus* was published have been largely neglected. In particular Spinoza's teacher Franciscus van den Enden, *Vrye Politijke Stellingen* 1665, Johan and Pieter de la Court, *Consideration van Staet* 1660, *Politike discoursen* 1662, Lodewijk Meyer, *Philosophia S Scripturae Interpres* 1666, the anonymous *De Jure Ecclesiasticorum* 1665 and Adriaan Koerbagh, *Een Bloemhof van allerley lieflijkheyd* 1668, *Een Ligt schynende in duystere plaatsen* 1668. The articles of this volume focus on their political philosophy as well as their philosophy of religion in order to assess their contributions to the development of radical movements: republicanism, anti-monarchism, critique of religion, atheism in the Enlightenment.

History of Medieval Philosophy Maurice Wulf, 1926. *Isagoge* Porphyry, Alain de Libera, A. Ph. Segonds, 1998. *L'Isagoge* est une introduction aux *Catégories* de Porphyre et définit les cinq prédicables: genre, espèce, différence propre et accident, et formule ce qui, grâce à Boèce, deviendra le principal problème logique et métaphysique du Moyen Âge occidental: le problème des universaux ouvrant la querelle qui, jusqu'à la fin du XVe siècle, verra s'affronter réalistes et nominalistes. La traduction française ici proposée est accompagnée du texte grec original et de la traduction latine de Boèce.
