Hollywood in the Holy Land Nickolas Haydock, E.L. Ridsen, 2014-01-10 This collection of essays analyzes film representations of the Crusades other medieval East West encounters and the modern inheritance of encounters between orientalist fantasy and apocalyptic conspiracy From studies of the filmic representations of popular figures such as El Cid Roland Richard I and Saladin to examinations of such topics as Templar romance and the role of set design location and landscape the essays make significant contributions to our understanding of orientalist medievalism in film Instructors considering this book for use in a course may request an examination copy here [History and Popular Memory](#) Paul A Cohen, 2014-05-13 When people experience a traumatic event such as war or the threat of annihilation they often turn to history for stories that promise a positive outcome to their suffering During World War II the French took comfort in the story of Joan of Arc and her heroic efforts to rid France of foreign occupation To bring the Joan narrative more into line with

current circumstances popular retellings modified the original story so that what people believed took place in the past was often quite different from what actually occurred Paul A Cohen believes this interplay between story and history is a worldwide phenomenon found in countries of radically different cultural religious and social character He focuses on Serbia Israel the Soviet Union China Great Britain and France all of which experienced severe crises in the twentieth century and in response appropriated age old historical narratives that resonated with what was happening in the present to serve a unifying restorative purpose A central theme in the book is the distinction between popular memory and history Although vitally important to historians this distinction is routinely blurred in people s minds and the historian s truth often cannot compete with the power of a compelling story from the past even when it has been seriously distorted by myth or political manipulation Cohen concludes by suggesting that the patterns of interaction he probes given their near universality may well be rooted in certain human propensities that transcend cultural difference
