Students and the Manual for Teachers **Percepción y variación lingüística** Rocío Caravedo, 2024-07-18 En este estudio la autora propone un acercamiento a la variación lingüística a través del instrumento central de la cognición la percepción. Se trata de un cambio del enfoque tradicional centrado en la producción de los hablantes. Fenómenos aparentemente similares tienen distintos valores porque son percibidos de modo diferente. La percepción es tratada como proceso colectivo más que individual de modo que se establece una conexión entre lo cognitivo y lo social. Hacia qué fenómenos se dirige la percepción por qué son percibidos de manera distinta por los hablantes que comparten una misma lengua cuál es el criterio si existe alguno que rige la percepción son algunas de las cuestiones abordadas en este volumen. Se mostrará que la percepción no es un mecanismo marginal sino que desempeña un papel central en la configuración de los fenómenos mismos y por lo tanto resulta determinante tanto en la variación cuanto en la invariación de una lengua. El estudio articula la teoría con la praxis. Así en la parte teórica después de someter a juicio los principales conceptos que han regido la investigación tradicional se presenta y razona el aparato conceptual ligado a la percepción. Son analizados los diferentes tipos de percepción su desarrollo y su orientación colectiva en una comunidad la diversidad perceptiva entre los hablantes de una misma lengua. En la parte empírica se aplican las distinciones propuestas al análisis concreto de los fenómenos más representativos de la variación interna del español en los planos fonológico léxico y sintáctico. Un subcapítulo final se concentra en la percepción en el contacto por migración tanto interna como externa entre variedades distintas de la misma lengua.

Cuestiones de percepción Steven Holl, 2014-12-23 En 1994 la revista japonesa *A+U* dedicó un número especial al tema de la percepción en la arquitectura. Publicación en la que Steven Holl Alberto Pérez Gómez y Juhani Pallasmaa colaboran con sendos ensayos. En el marco de un feroz debate a propósito de la introducción de los nuevos instrumentos digitales en el estudio de arquitectura Steven Holl se desmarca radicalmente del tema para explicar el importante papel que desempeña la percepción humana la experiencia fenoménica y la intuición en la experiencia y la formación perceptiva del espacio construido. Junto al análisis de

unas zonas fenom nicas que se corresponden con los diferentes fen menos perceptivos Holl expone su propia experiencia directa con la arquitectura e ilustra el tipo de matices fenomenol gicos sobre los que se apoyan sus argumentos

Suspensiones de la percepci n Jonathan Crary, 2008-03-01 *Suspensiones de la percepci n* analiza la naturaleza parad jica de la atenci n en la cultura moderna en tanto ha constituido tanto una condici n fundamental de la libertad individual la creatividad y la experiencia cuanto un elemento central para el funcionamiento eficiente de las instituciones y de la econom a El autor sostiene que nuestra manera de contemplar y escuchar al otro es el resultado de un cambio crucial que se produjo en la naturaleza de la percepci n en la segunda mitad del siglo diecinueve
