Intelligent Techniques in E-Commerce Zhaohao Sun,Gavin R. Finnie,2013-03-20 E commerce has passed through a number of stages in the minds of most readers of the daily press Initially it was the province of the specialist and considered almost irrelevant to the needs and activities of everyday life companies looking for venture capital in this area had little if any chance of obtaining sufficient funds from the rather conservative investors who provided the only source of start up capital Then came the dot com boom and suddenly e commerce was the most exciting topic possible Venture capital was available from every possible source and almost any company with a com in its name could be assured of instant funding on request This boom was inevitably followed by the dot com bust and the press wamed that the days of e commerce were gone perhaps never to return This apparently confusing stages of growth model is in reality nothing ofthe sort E commerce is simply the logical outcome of combining computers with tele communications networks The astonishing changes which a global economy has brought with it are reflected in the changes to the way we do business which are increasingly synonymous with e commerce Indeed the term e commerce itself is coming to mean only the transaction based component of e business any process that a business organisation conducts over a computer mediated network as Thomas Mesenbourg ofthe U S Census Bureau said in 1999

**Managing E-commerce and Mobile Computing Technologies** Julie R. Mariga,2003-01-01 Examining the challenges and limitations involved in implementing and using e commerce technologies this guide describes how these technologies have been very instrumental to many organizations around the globe Discussed is how through the use of electronic commerce organizations of all sizes and types are able to conduct business without worrying about the territorial market limitations of the past Additionally how mobile commerce technologies are further enabling such organizations to communicate more effectively is reviewed Also covered are the potential for a B2B marketplace deploying Java mobile agents and e business experiences with online auctions

E-Commerce and Intelligent Methods Javier Segovia,Piotr S. Szczepaniak,Marian Niedzwiedzinski,2002-08-06 This book covers significant recent developments in the field of Intelligent Meth ods applied to

eCommerce The Intelligent Methods considered are mainly Soft Computing Methods that include fuzzy sets rough sets neural networks evolutionary computations probabilistic and evidential reasoning multivalued logic and related fields There is not doubt about the relevance of eCommerce in our daily environments and in the work carried out at many research centers throughout the world The application of AI to Commerce is growing as fast as the computers and networks are being integrated in all business and commerce aspects We felt that it was time to sit down and see how was the impact into that field of low level AI i.e softcomputing We found many scattered contributions disseminated in conferences workshops journal books or even technical reports but nothing like a common framework that could serve as a basis for further research comparison or even prototyping for a direct transfer to the industry We felt then the need to set up a reference point a book like this We planned this book as a recompilation of the newest developments of researchers who already made some contribution into the field The authors were selected based on the originality and quality of their work and its relevance to the field Authors came from prestigious universities and research centers with different backgrounds
