Econ New Approach:

The Economic Approach to Human Behavior Gary S. Becker, 2013-02-06 Since his pioneering application of economic analysis to racial discrimination Gary S. Becker has shown that an economic approach can provide a unified framework for understanding all human behavior. In a highly readable selection of essays, Becker applies this approach to various aspects of human activity including social interactions, crime and punishment, marriage, fertility, and the family, and irrational behavior. Becker's highly regarded work in economics is most notable in the imaginative application of the economic approach to a surprising breadth of human activity. Becker's essays over the years have inevitably inspired a surge of research activity in testimony to the richness of his insights into human activities lying outside the traditionally conceived economic markets. Perhaps no economist in our time has contributed more to expanding the area of interest to economists than Becker, and a number of these thought-provoking essays are collected in this book. Choice. Gary Becker was awarded the Nobel Prize in Economic Science in 1992.

Beyond Traditional Probabilistic Methods in Economics Vladik Kreinovich, Nguyen Ngoc Thach, Nguyen Duc Trung, Dang Van Thanh, 2018-11-24 This book presents recent research on probabilistic methods in economics, from machine learning to statistical analysis. Economics is a very important and at the same time a very difficult discipline. It is not easy to predict how an economy will evolve or to identify the measures needed to make an economy prosper. One of the main reasons for this is the high level of uncertainty. Different difficult-to-predict events can influence the future economic behavior. To make good predictions and reasonable recommendations, this uncertainty has to be taken into account. In the past, most related research results were based on using traditional techniques from probability and statistics, such as p-value based hypothesis testing. These techniques led to numerous successful applications, but in the last decades, several examples have emerged showing that these techniques often lead to unreliable and inaccurate predictions. It is therefore necessary to come up with new techniques for processing the corresponding uncertainty that go beyond the traditional probabilistic techniques. This book focuses on such techniques, their economic applications, and the remaining challenges, presenting both related theoretical developments and their practical applications.

The New Economy in Transatlantic Perspective Kurt Huebner, 2005-02-03 What's left from the new economy? This book takes an unfashionable perspective and shows that despite all the mistaken ideas and exaggerations, the technological changes of the 1990s still have important effects today. Economic history shows that technological revolutions tend to generate deep economic and social crises before a temporary state of equilibrium is reached. The established modes of accumulations and regimes of regulation of national capitalisms and international capitalism have been undermined by the collapse of the high-tech asset bubble. Financial markets are still in disarray. What can be observed, however, is that national economies are better positioned to tackle the crisis than others. Why is this? This and other important questions are tackled by an international team of contributors, including Daniele Archibugi, Harald Hagemann, Bruno Amable, Martin Heidenreich, and David Gibbs. This volume

should be of great interest to all those working at the intersection of international politics and economics *The Future of Economics* M. Umer Chapra, 2016-07-04 This profound book is a powerful yet balanced critique of mainstream economics that makes a forceful plea for taking economics out of its secular and occident centred cocoon It presents an innovative and formidable case to re link economics with moral and egalitarian concerns so as to harness the discipline in the service of humanity M Umer Chapra is ranked amongst the Top 50 Global Leaders in Islamic economics ISLAMICA 500 2015 and has been awarded with two prestigious awards for his contributions to the field Islamic Development Bank Award for Islamic Economics 1989 and the King Faisal International Prize for Islamic Studies 1989 Essays on: The Nature and State of

Modern Economics Tony Lawson, 2015-04-17 What do modern academic economists do What currently is mainstream economics What is neoclassical economics And how about heterodox economics How do the central concerns of modern economists whatever their associations or allegiances relate to those traditionally taken up in the discipline And how did economics arrive at its current state These and various cognate questions and concerns are systematically pursued in this new book by Tony Lawson The result is a collection of previously published and new papers distinguished in providing the only comprehensive and coherent account of these issues currently available The financial crisis has not only revealed weaknesses of the capitalist economy but also highlighted just how limited and impoverished is modern academic economics Despite the failings of the latter being more widely acknowledged now than ever there is still an enormous amount of confusion about their source and true nature In this collection Tony Lawson also identifies the causes of the discipline s failings and outlines a transformative solution to its deficiencies Amongst other things Lawson advocates for the adoption of a more historical and philosophical orientation to the study of economics one that deemphasizes the current focus on mathematical modelling while maintaining a high level of analytical rigour In so doing Lawson argues for a return to long term systematic and sustained projects in the manner pursued by the likes of Marx Veblen Hayek and Keynes concerned first and foremost with advancing our understanding of social reality Overall this forceful and persuasive collection represents a major intervention in the on going debates about the nature state and future direction of economics **Economic**

Methodology Harro Maas, 2014-03-05 Ever since the inception of economics over two hundred years ago the tools at the discipline s disposal have grown more and more more sophisticated This book provides a historical introduction to the methodology of economics through the eyes of economists The story begins with John Stuart Mill s seminal essay from 1836 on the definition and method of political economy which is then followed by an examination of how the actual practices of economists changed over time to such an extent that they not only altered their methods of enquiry but also their self perception as economists Beginning as intellectuals and journalists operating to a large extent in the public sphere they then transformed into experts who developed their tools of research increasingly behind the scenes No longer did they try to influence policy agendas through public discourse rather they targeted policymakers directly and with instruments that

showed them as independent and objective policy advisors the tools of the trade changing all the while In order to shed light on this evolution of economic methodology this book takes carefully selected snapshots from the discipline s history It tracks the process of development through the nineteenth and twentieth centuries analysing the growth of empirical and mathematical modelling It also looks at the emergence of the experiment in economics in addition to the similarities and differences between modelling and experimentation This book will be relevant reading for students and academics in the fields of economic methodology history of economics and history and philosophy of the social sciences **Taking a**

Common Concern Approach to Economic Inequality Alexander D. Beyleveld, 2022-03-16 The open access publication of this book has been published with the support of the Swiss National Science Foundation Are countries capable of reducing economic inequality under conditions of contemporary globalisation without cooperating and coordinating with other countries While states are far from powerless to effect distributional change within their own sovereign space Taking a Common Concern Approach to Economic Inequality makes the case that cooperation and coordination is indeed necessary especially in relation to corporate taxation It accordingly contemplates the utility of a transnational taxation system that is embedded in cooperative sovereignty through the recognition of rising economic inequality and its deleterious effects including how increasingly unequal distributions within countries make transnational cooperation and coordination efforts less likely as a common concern of humankind *Endogenous Origins of Economic Reforms in India and China* Rajiv G.

Maluste, 2011-07 Attitudinal change in the context of economic reforms has been referred to in Rodrik and Subramanian 2005 DeLong 2003 Kohli 1989 and Panagariya 2004 2008 This dissertation provides empirical support for this literature establishing an earlier start for India s economic policy liberalisation than presented in stylized accounts It demonstrates the endogenous nature of the origins of these policy shifts Attitudinal change literature had directed attention to the need for further research into India s policy changes of the early 1980s and for studying broader comparability issues in other developing countries This research makes a contribution towards filling these gaps This dissertation shows that India started its economic liberalisation under the Indira Gandhi administration from 1980 to 1984 These findings depart from the conventional view that India s economic policy changes were initiated by the Narasimha Rao government in 1991 or by the Rajiv Gandhi administration in the mid to late 1980s The dissertation establishes that policy shifts of the early 1980s had endogenous origins in the political leadership s attitudinal changes The Indira Gandhi administration of the early 1980s revisited the statist policies of its previous tenure from 1966 to 1977 The new approach entailed more openness towards private enterprise scaling back the role of the public sector and starting India s integration into the global economy The dissertation also discusses the comparable role of attitudinal changes at the start of China s policy liberalisation led by Deng Xiaoping from 1978 to 1982 It focuses on the significance and challenges faced by China s political leadership in bringing about societal attitudinal change The dissertation concludes by drawing comparisons between India and China developing a

linkage between their endogenous attitudinal changes and economic policy liberalisation Growth of the International Economy 1820-2000 George Kenwood,A.G. Kenwood,Alan Loughheed,A.L. Loughheed,2002-06 This text is widely acknowledged to be the best available introduction to the study of the international economy as a mechanism for diffusing modern economic growth between nations Updating the story to the present day this edition covers the latest developments in international economics Significant new additions include globalization and the world economy the growth of regional trading blocs globalization and financial crisis in Asia transition to the market in post communist economies Packed with new references and data The Growth of the International Economy is an indispensable guide to the world economy as it enters the new millennium

In and against Development: From New to Newest Development Economics Ben Fine,2025-02-27 The Economics of Everything or Economics Imperialism now has a dominant presence in development economics and an agenda setting role in development studies with the World Bank taking a leading if contested role This volume examines how this happened charting the evolution from the old or classic development economics through the new newer and newest development economics Drawing critically upon the Kuhnian notions of paradigm shifts corresponding changes are contextualised materially intellectually and policy wise Covering key issues such as famine the developmental state and trade and industrial policy detailed attention is paid to the potential for alternatives for economics and economic policies

Simulation in Computational Finance and Economics: Tools and Emerging Applications Alexandrova-Kabadjova, Biliana,Martinez-Jaramillo, Serafin,Garcia-Almanza, Alma Lilia,Tsang, Edward,2012-08-31 Simulation has become a tool difficult to substitute in many scientific areas like manufacturing medicine telecommunications games etc Finance is one of such areas where simulation is a commonly used tool for example we can find Monte Carlo simulation in many financial applications like market risk analysis portfolio optimization credit risk related applications etc Simulation in Computational Finance and Economics Tools and Emerging Applications presents a thorough collection of works covering several rich and highly productive areas of research including Risk Management Agent Based Simulation and Payment Methods and Systems topics that have found new motivations after the strong recession experienced in the last few years Despite the fact that simulation is widely accepted as a prominent tool dealing with a simulation based project requires specific management abilities of the researchers Economic researchers will find an excellent reference to introduce them to the computational simulation models The works presented in this book can be used as an inspiration for economic researchers interested in creating their own computational models in their respective fields Managerial Dilemmas Gary J. Miller,1992 Managerial

Dilemmas extends the use of analytical techniques from organisational economics to the spheres of organisational culture and leadership in politics and business **The Political Economy of Soil Erosion in Developing Countries** Piers Blaikie,2016-05-20 First published in 1985 This book examines wide variety of ways in which environmental deterioration in particular soil erosion can be viewed and the implicit political judgements that often inform them Using the context of

developing countries where the effects tend to be more acute due to underdevelopment and climatic factors this work aims to examine this source of uncertainty and make explicit the underlying assumptions in the debate about soil erosion It also rejects the notion that soil erosion is a politically neutral issue and argues that conservation requires fundamental social change This title will be of interest to students of environmental and developmental studies

Industrial and Regional Policies in an Enlarging EU David Bailey, Lisa De Propriis, 2014-10-20 After years of near disrepute in official circles Industrial Policy has made something of a comeback over the last few years and is now very much back on the agenda at national and EU levels driven by concerns over globalisation deindustrialisation unemployment and perceived poor growth in the EU Simultaneously the European Commission's Fourth Report on Economic and Social Cohesion has kicked off the debate over challenges to cohesion the shape of EU Cohesion policy beyond 2013 and how resources should be managed This debate will find added momentum with the imminent mid term review being launched by the Commission Discussions over the success or not of the Lisbon Agenda on going debates over cluster policies and recent developments in policy evaluation have also contributed to a burgeoning academic literature over the last eighteen months This edited volume is especially pertinent given such developments and pulls together a diverse range of contributions from leading authorities in the field to add to these debates and to illustrate connections between them This book was published as a special issue of Policy Studies

Development Economics in the Twenty-First Century Claudia Sunna, Davide Gualerzi, 2015-12-14 Development Economics has been identified as a homogeneous body of theory since the 1950s concerned both with the study of development issues and with the shaping of more effective policies for less advanced economies Development Economics in the Twenty First Century brings together an international contributor team in order to explore the origins and evolution of development economics This book highlights the different elements of high development theory through a precise reconstruction of the different theoretical approaches that developed between the 1950s and the 1970s These include the theory of balanced and unbalanced growth theory the debate on international trade the concept of dualism dependency theory structuralism and the analysis of poverty and institutions The chapters highlight the relevance and usefulness of these analyses for the contemporary theoretical debate on development issues Comparative perspectives are explored and analysed including those of Keynes Hirschman Krugman and Stiglitz The chapters situate development economics within current debates among economists and historians of economic thought providing a platform for future research This book is suitable for researchers and students with an interest in Development Economics the History of Economic development and the Economics of Developing Countries

Economic Cycles, Crises, and the Global Periphery Leonid Grinin, Andrey Korotayev, Arno Tausch, 2016-10-25 This thought provoking monograph analyzes long medium and short term global cycles of prosperity recession and depression plotting them against centuries of important world events Major research on economic and political cycles is integrated to clarify evolving relationships between the global center and its periphery as well as
