

The population of the United States is expected to grow over the next ten years at a rate of 0.1%. (In 1980, the rate was 2.2%.)<sup>1</sup>

Economic growth is simply the rise in workers and their productivity.

We need more workers, but 10,000 Americans are retiring every day.<sup>2</sup>

Corporations need to reinvest in productivity and the government should look at worthwhile infrastructure projects.

Growth from productivity leads to a higher standard of living. It is a goal everyone should strive to achieve. Unfortunately, growth in productivity has been slowing for decades.

U.S. corporations are holding around \$3 trillion overseas to avoid taxes. We need policy to encourage that money to be brought home.

The average age of retirement in the United States.<sup>3</sup> Many older Americans just don't have the health to productively work full-time.
