Global Price Fixing John M. Connor, 2013-12-01 Some books get written others write themselves This book is the latter type I have devoted myself to studying the economic organization of industries related to food and agriculture for almost twenty five years It has been my good fortune to work at places that tolerated my gadfly approach to research So long as I produced a few publications each year and wooed a few graduate students to share those interests I was free to pursue an array of topics why firms diversify the competitive role of advertising strategies for selling in overseas markets measuring market power and many others Although firmly anchored in the eclectic analytical framework of industrial economics and focused on the food system I traversed a wide field at will Some years ago I had pretty much convinced myself that naked price fixing was not a high priority for scholarship in these industries True collusion was rife in a few food industries such as bid rigging among suppliers of fluid milk to school districts in isolated rural districts Ripping off milk money from school children is reprehensible enough but the size of the economic losses from localized price fixing paled besides other sources of imperfect competition

The Political Economy of the Sherman Act E. Thomas Sullivan, 1991 This book examines the legislative history and the political economy of the Sherman Antitrust Act the main federal statute that regulates economic activity in the United States Tracing the evolution of the antitrust movement in the United States since 1890 this collection of essays examines the role of government in regulating markets and the balance it and its critics seek between the goal of limited government and the protection of free open and competitive markets With markets today being more international in nature and the world economy being globalized

procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market. Hitherto their close connection has been noted but not closely examined. This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market. In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent. As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant. The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective. The analysis is both legal and economic. Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement.
