Economic Information, Decision, and Prediction M. Marschak, 1980-01-31

Neuroscience in Information Systems Research René Riedl, Fred D. Davis, Rajiv Banker, Peter H. Kenning, 2017-01-25 This book shows how information systems IS scholars can effectively apply neuroscience expertise in ways that do not require neuroscience tools However the approach described here is intended to complement neuroscience tools not to supplant them Written by leading scholars in the field it presents a review of the empirical literature on NeuroIS and provides a conceptual description of basic brain function from a

cognitive neuroscience perspective Drawing upon the cognitive neuroscience knowledge developed in non IS contexts the book enables IS scholars to reinterpret existing behavioral findings develop new hypotheses and eventually test the hypotheses with non neuroscience tools At its core the book conveys how neuroscience knowledge makes a deeper understanding of IS phenomena possible by connecting the behavioral and neural levels of analysis

Blockchain and Private International Law Andrea Bonomi,Matthias Lehmann,Shaheez Lalani,2023-11-13 The open access publication of this book has been published with the support of the Swiss National Science Foundation Blockchain is the first global mechanism for the transfer and storage of value Despite being conceived as an alternative to state and law the technology and its use cases raise many legal questions most notably regarding jurisdiction and applicable law with respect to transactions and assets recorded on the blockchain The issue is complex given the decentralised nature of the network In this volume academics and practitioners from various countries try to provide detailed answers to these questions as they relate to crypto assets cryptocurrencies crypto derivatives stablecoins Central Bank Digital Currencies and Decentralised Autonomous Organisations DAOs as well as specific transactions and issues such as property rights secured transactions smart contracts and bankruptcy With specific chapters on national approaches Germany Japan Liechtenstein Switzerland United States the volume explores the need and possibility for legal harmonisation of these issues through global fora such as the Hague Conference on Private International Law HCCH UNIDROIT

Predictocracy Michael Abramowicz,2008-10-01 Predicting the future is serious business for virtually all public and private institutions for they must often make important decisions based upon such predictions This text explores how institutions might improve their predictions and arrive at better decisions by means of prediction markets

Assessing and Responding to the Growth of Computer Science Undergraduate Enrollments National Academies of Sciences, Engineering, and Medicine,Division on Engineering and Physical Sciences,Computer Science and Telecommunications Board,Policy and Global Affairs,Board on Higher Education and Workforce,Committee on the Growth of Computer Science Undergraduate Enrollments,2018-04-28 The field of computer science CS is currently experiencing a surge in undergraduate degree production and course enrollments which is straining program resources at many institutions and causing concern among faculty and administrators about how best to respond to the rapidly growing demand There is also significant interest about what this growth will mean for the future of CS programs the role of computer science in academic institutions the field as a whole and U S society more broadly Assessing and Responding to the Growth of Computer Science Undergraduate Enrollments seeks to provide a better understanding of the current trends in computing enrollments in the context of past trends It examines drivers of the current enrollment surge relationships between the surge and current and potential gains in diversity in the field and the potential impacts of responses to the increased demand for computing in higher education and it considers the likely effects of those responses on students faculty and institutions This report provides recommendations for what institutions of higher education

government agencies and the private sector can do to respond to the surge and plan for a strong and sustainable future for the field of CS in general the health of the institutions of higher education and the prosperity of the nation *Innovation Policy and the Economy 2013* Josh Lerner, Scott Stern, 2014-04-04 Appreciation of the importance of innovation to the economy has increased over the past decade There is an active debate regarding the implications of technological change for economic policy and the appropriate policies and programs regarding research innovation and the commercialization of new technology This debate has only intensified as policymakers focus on new sources of innovation and growth in light of the recent economic downturn and the associated focus on enhancing employment and growth Four of the five papers in this year's volume highlight the increasing role of the Internet and digitization in our understanding of the changing nature of innovation and entrepreneurship and the impact of innovation policy The first offers an overview of the impact of Big Data on the ability to conduct novel types of measurement and research in economics and related fields The second highlights the increasingly sophisticated and creative research designs that have been used to evaluate the interplay between piracy the availability of legitimate digital channels and the impact of anti piracy enforcement efforts The third paper provides an overview of the rapidly emerging area of crowdfunding The fourth addresses the underpinnings of much of the digital economy by focusing on the institutional logic of standard setting organizations and the conditions that allow standard setting bodies to function and achieve their objectives The final paper focuses on the interplay between geographic clusters entrepreneurship and innovation
