

Document B: Supreme Court Must Realize Affirmative Action Doesn't Improve Education

By Douglas A. Kahn

The Supreme Court has permitted affirmative action, but with limitations. The judicial decisions on this issue have focused on the educational value of having diversity in the student body. But I have observed from my experience that racial diversity has no effect on educational quality and is not the real rationale for the affirmative action policy.

In my view, the true rationale for affirmative action comes from the view that it is problematic. If Americans are to live harmoniously together, all parts of society should participate in its important functions. That justification explains why preference is really given to minorities: They also should be able to participate in the American dream.

There is a case for diversity's benefiting student life outside of the classroom. But even there, the benefits are not so substantial as to justify a large-scale program that rests on utilizing race or ethnicity as a factor in choosing a student body. Moreover, socializing students is not the main function of a university.

A university education is primarily an intellectual activity. If the faculty believed that diversity was important, they would seek to have an intellectually diverse faculty. But most universities devote little-to-no effort to add faculty members who hold diverse political and ideological views.

Another rationalization made for affirmative action is to compensate for past injuries done to specific groups. While there is no disputing that great wrongs were done to African-Americans in the past, the people who benefit from affirmative action are not the ones who have directly suffered these past wrongs.

While racial discrimination continues to exist, it is reduced from and evolved from what it once was. There is reason to doubt that racial discrimination today is any more of a problem than discrimination against many other groups who are not included in affirmative action programs - women, people of certain religions, people with disabilities, or people with low socio-economic status.

In my view, while it served its purpose, it is no longer needed. African-Americans occupy important positions in this country. The president of the United States, members of the cabinet and Congress, a member of the Supreme Court, and numerous judges and officials are African-Americans.

Economic Perspectives On Affirmative Action:

Economic Perspectives on Affirmative Action Mary Virginia Lee Badgett, 1995 The three scholarly articles that make up this book examine affirmative action in economic terms measuring and discussing the economic cost of racial discrimination in employment and the economic cost of equal opportunity enacted to combat discrimination and its effects The short article by Andrew Brimmer an economist who was the first black governor of the Federal Reserve Board calculates the financial cost to the nation of racial discrimination in employment education and training Cecilia Conrad's article surveys an array of experts and concludes that the direct financial costs to government and private industry of maintaining affirmative action policies is quite small she also concludes that the popular perception of a productivity loss caused by affirmative action has little basis in demonstrable fact Finally Lee Badgett and Heidi Hartmann examine the many studies that have been done to assess the effectiveness of affirmative action policies in increasing employment and wage opportunities for both women and African Americans they conclude that such policies have had measurable effects though they have often been slight *Economic Perspectives on Affirmative Action in College Admissions* Eric K. Furstenberg, 2004

Blacks and the Quest for Economic Equality James W. Button,Barbara A. Rienzo,Sheila L. Croucher,2009-01-01 The civil rights movement of the 1960s improved the political and legal status of African Americans but the quest for equality in employment and economic well being has lagged behind Blacks are more than twice as likely as whites to be employed in lower paying service jobs or to be unemployed are three times as likely to live in poverty and have a median household income barely half of that for white households What accounts for these disparities and what possibilities are there for overcoming obstacles to black economic progress This book seeks answers to these questions through a combined quantitative and qualitative study of six municipalities in Florida Factors impeding the quest for equality include employer discrimination inadequate education increasing competition for jobs from white females and Latinos and a lack of transportation job training affordable childcare and other sources of

support which makes it difficult for blacks to compete effectively Among factors aiding in the quest is the impact of black political power in enhancing opportunities for African Americans in municipal employment The authors conclude by proposing a variety of ameliorative measures strict enforcement of antidiscrimination laws public policies to provide disadvantaged people with a good education adequate shelter and food and decent jobs and self help efforts by blacks to counter self destructive attitudes and activities
