*Economic Stabilization and Debt in Developing Countries* Richard N. Cooper, 1992 Drawing on preliminary results from a massive study conducted by the World Bank to probe the links between stabilization and growth Cooper examines the experience of developing countries faced by the oil shocks of the 1970s and the debt crisis of the 1980s He points out that a global slowdown in growth has shifted the main economic concern in developing countries from long term growth to stabilization and adjustment Cooper takes into account the cross country variables that influence the degree to which a country is affected negatively or positively by external shocks and covers such topics as political organization and external debt resolution The first chapter focuses on countries that experienced adverse shocks from the sharp increase in oil prices beginning in 1974 It also addresses countries that should have benefited from the oil price increase and from a comparable increase in coffee prices for which events turned out to be less favorable than they seemed The second chapter analyzes the disabsorption a country faces when it can no longer rely on foreign lending or advantageous terms of trade it also looks at inflationary pressures and at the role of the International Monetary Fund in designing stabilization programs for its member countries The third chapter discusses the main influences on a country's economic performance and also discusses the lessons offered for successful stabilization and long term growth Moving from individual developing nations to the world economic system the final two chapters examine the question of external debt and why it has proved to be such an international stumbling block offering suggestions on how it might be resolved

**World Economy** Jaime De Melo,2015-03-26 Differences in the choices of trade and macro policies both by developing countries and by developed countries towards developing countries have been critical in determining the overall performance of developing countries All too often the performance of developing countries has not been assessed using appropriately conducted studies The papers in this book are chosen to bridge this gap and show how a quantitative approach to policy evaluation can help resolve controversies and explain the choice of observed policies The book brings together carefully selected papers that assess the impacts of various trade and macro policies by quantifying the policies of developing countries at the macro level exchange rate investment savings and at the sector level trade and industrial policies in addition to policies of developed countries towards developing countries trade preferences quotas VERs and migration policies Facets of the political economy of trade migration and climate policies are explored such as the enlargement of the EU the rise of regionalism and how it can ease the pains of adjustment to trade liberalization openness and inequality Growing tensions between trade and the environment are also investigated In short this book covers a wide area of events ranging from
