Fiscal Implications of an Aging Population Dieter Bös,Sijbren Cnossen,2012-12-06 Serious research into the causes and implications of an aging population is a relatively recent phenomenon Though several relevant issues of

aging have received considerable attention in public and political discussions especially in European countries and in Japan the economics profession is somewhat lacking behind This is particularly true for the theoretical underpinnings of the economics of population aging Until now the aging debate is primarily led by institutionalists The present book with its analytical and econometric studies on fiscal implications of population aging is an important step in the process of theoretical analysis of aging It is of interest both for population economists and demographers and for public economists providing a bridge between these areas of research Aging, Society, and the Life Course, Fifth Edition Leslie A. Economics of an Ageing Population, The: Macroeconomic Issues Paolo Onofri, 2004-01-01 In April 2000 the Japanese government's Economic and Social Research Institute ESRI initiated A Study on Sustainable Economic and Social Structure in the Twenty first Century to complement the Millennium Project by focusing on aging and environmental problems in the foreseeable future The series reports the Study's findings **Developments in the Economics of Aging** David A. Wise, 2009-08-01 The number of Americans eligible to receive Social Security benefits will increase from forty five million to nearly eighty million in the next twenty years Retirement systems must therefore adapt to meet the demands of the largest aging population in our nation's history In **Developments in the Economics of Aging** David A. Wise and a distinguished group of analysts examine the economic issues that will confront policy makers as they seek to design policies to protect the economic and physical health of these older Americans The volume looks at such topics as factors influencing work and retirement decisions at older ages changes in life satisfaction associated with retirement and the shift in responsibility for managing retirement assets from professional money managers of traditional pension plans to individual account holders of 401 k's **Developments in the Economics of Aging** also addresses the complicated relationship between health and economic status including why health behaviors vary across populations and how socioeconomic measures correlate with health outcomes **Population Aging, Intergenerational Transfers and the Macroeconomy**

Robert L. Clark, Naohiro Ogawa, Andrew Mason, 2007-01-01 Population aging is a global phenomenon that influences not only the industrialized countries of Asia and the West but also many middle and low income countries that have experienced rapid fertility decline and achieved long life expectancies This book explores how workers and consumers are responding to population aging and examines how economic growth generational equity trade and international capital flows are influenced by population aging The contributors draw on the experience of the developing and industrialized worlds and on countries in Asia North America and Europe They offer new evidence about micro level responses of labor force participation earnings and savings to actual and or perceived demographic change Their broad perspective on population aging spans the entire demographic transition and demonstrates the importance of effective policy response in the early stages of population aging Also included are policy analyses that explore the use of tax policy financial reform and policies targeting immigration and procreation This insightful study will prove invaluable to students and scholars of population economics public sector

economics welfare economics social economics and public finance Pension analysts and government policymakers will find the material of great practical use **Inquiries in the Economics of Aging** David A. Wise, 2008-04-15 For over a decade the National Bureau of Economic Research has sponsored the Economics of Aging Program under the direction of David A. Wise The program addresses issues that affect the well being of individuals as they age and a society that is composed increasingly of older people Within the next twenty years an unprecedented proportion of Americans will be over sixty five New research in the economics of aging is an essential element of understanding what the future holds for this aging population Inquiries in the Economics of Aging presents both empirical papers that consider questions that are fundamental to public policy and more theoretical contributions that lay new groundwork for future research in the economics of aging Inquiries in the Economics of Aging provides a timely overview of some of the most important questions facing researchers on aging and outlines new techniques and models that may help to answer these questions This important volume will be of great interest to specialists and policy makers as it paves the way for future analysis Aging in the United States and Japan Yukio Noguchi, David A. Wise, 2008-04-15 Japanese and American economists assess the present economic status of the elderly in the United States and Japan and consider the impact of an aging population on the economies of the two countries With essays on labor force participation and retirement housing equity and the economic status of the elderly budget implications of an aging population and financing social security and health care in the 1990s this volume covers a broad spectrum of issues related to the economics of aging Among the book's findings are that workers are retiring at an increasingly earlier age in both countries and that as the populations age baby boomers in the United States will face diminishing financial resources as the ratio of retirees to workers sharply increases The result of a joint venture between the National Bureau of Economic Research and the Japan Center for Economic Research this book complements Housing Markets in the United States and Japan 1994 by integrating research on housing markets with economic issues of the aged in the United States and Japan
