leadership in January 2017 a top priority must be to address the bleak peacebuilding record where over half of the countries under UN watch relapse back into conflict within a decade While policy debate and the academic literature have focused on the security political and social aspects of the war to peace transition this book focuses on the economic transition that is economic reconstruction or the political economy of peace which in the author's view is the much neglected aspect of peacebuilding The book argues that rebuilding war torn states effectively has acquired a new sense of urgency since extremist groups increasingly recruit people by providing jobs and services to those deprived of them due to government and economic failures Based on past lessons and best practices of the last quarter of a century the author makes recommendations to move forward and improve the record It will be of great use to students and scholars of peacebuilding as well as policymakers in national governments donor countries and international organizations involved in peacebuilding statebuilding and development
