Darius Ornston,2012-07-28 At the close of the twentieth century Denmark Finland and Ireland emerged as unlikely centers for high tech competition In When Small States Make Big Leaps Darius Ornston reveals how these historically low tech countries managed to assume leading positions in new industries such as biotechnology software and telecommunications equipment In each case countries used institutions that are commonly perceived to delay restructuring to accelerate the redistribution of resources to emerging enterprises and industries Ornston draws on interviews with hundreds of politicians policymakers and industry representatives to identify two different patterns of institutional innovation and economic restructuring Irish policymakers worked with industry and labor representatives to contain costs and expand market competition Denmark and Finland adopted a different strategy converting an established tradition of private public and

industry labor cooperation to invest in high quality inputs such as human capital and research Both strategies facilitated movement into new high tech industries but with distinctive political and economic consequences In explaining how previously slow moving states entered dynamic new industries Ornston identifies a broader range of strategies by which countries can respond to disruptive challenges such as economic internationalization rapid technological innovation and the shift to services

**The Politics of Labor in a Global Age** Christopher Candland, Rudra Sil, 2001-09-20 The Politics of Labor in a Global Age is one of the first works to analyse and compare recent shifts in patterns of industrial relations across late industrializing and post socialist economies The volume features original and timely essays on labor relations at national local and workplace levels as economic and political actors cope with the similar challenges associated with economic adjustment measures and the impact of globalization The authors reveal that while globalization has threatened the position of organized labor and prompted business and state elites to accommodate greater labor market flexibility the legacies of past institutions remain evident in distinctive trends in labor politics within and across late industrializing and post socialist settings The comparisons suggest that globalization is best understood not as a source of convergence but as a set of common pressures that are mediated by specific historical inheritances that spur varied responses on the part of industrial relations actors and that facilitate quite diverse institutional outcomes

**Continuity, Change and Crisis in Contemporary Ireland** Brian Girvin, Gary Murphy, 2013-10-18 The focus of this book is to analyse from a number of perspectives the politics of change in Ireland north and south since 1969 The emergence of the troubles in Northern Ireland the final push to gain entry to the EEC changing social mores and severe

economic difficulties all begin to appear on the horizon at this stage While considerable change and indeed moments of extreme crisis have taken place in areas such as Northern Ireland the economy moral politics and Ireland's attitude towards the European Union continuity has also been a significant hallmark of Irish politics since 1969 This volume offers important perspectives and opens up new debates in explaining the phenomena of continuity change and crisis in contemporary Ireland New evidence on the origins of the troubles in Northern Ireland the Arms Crisis Ireland's relationship with Europe the process of social partnership and the politics of morality all offer important fresh insights into how contemporary Ireland has functioned Featuring a number of high profile scholars and uniquely dealing with both Northern Ireland and the Republic of Ireland this volume argues that the intriguing feature of recent Irish history is not the absence of change but the extent to which change has been mediated by the existing political cultures national traditions and long standing institutions of both north and south This book was based on a special issue of Irish Political Studies Showcasing Globalisation? Nicola Jo-Anne Smith, 2005 This book examines in depth what is perhaps the test case for globalization the Irish Republic Not only is Ireland hailed as the most globalized economy in the world but its transformation into the Celtic Tiger in the 1990s is seen to demonstrate how nations can flourish in the new global economy By implication if other countries are to emulate Ireland's success they too must submit to the exogenous forces of globalization
