development techniques We anticipate therefore that object oriented programming will be a fruitful subject of research for many years to come This year the program committee received 132 submissions of which 25 were accepted for publication after a thorough reviewing process Every paper received at least 4 reviews Papers were evaluated based on relevance significance clarity originality and correctness The topics covered include programming concepts program analysis software engineering aspects and components middleware verification systems and implementation techniques These were complemented by two invited talks from Matthias Felleisen and Tom Henzinger Their titles and abstracts are also included in these proceedings

**ECOOP '87. European Conference on Object-Oriented Programming** Jean Bezivin, Jean-Marie Hullot, Pierre Cointe, Henry Lieberman, 2007-03-06 In October 1983 an informal meeting was organized in Le Cap d'Agde with the help of the BIGRE bulletin Sixty people turned out to hear more than ten presentations on object oriented programming More important was their unanimous demand for other more structured encounters So about one year later the Object group was created by AFCET A second workshop was organized in Brest and again one year later in Paris each time showing increased attendance and interest The success of these meetings and the fact that similar activities were taking place in other European countries especially Great Britain and Germany led to the idea of an annual European Conference providing a forum for theorists and practitioners interested in the object oriented programming paradigm It is impossible to acknowledge here all the people and organizations that welcomed with great enthusiasm the birth of the ECOOP conference and contributed to its organization More than a hundred submissions were received and the program committee had the unpleasant task of turning down many valuable contributions We hope however that the selection of papers for ECOOP 87 emphasizes the fundamental issues and problems of object oriented programming and will point toward interesting future
