Supernatural Agents Ilkka Pyysiainen, 2009-04-27 The cognitive science of religion is a rapidly growing field whose practitioners apply insights from advances in cognitive science in order to provide a better understanding of religious impulses beliefs and behaviors In this book Ilkka Pyysiainen shows how this methodology can profitably be used in the comparative study of beliefs about superhuman agents He begins by developing a theoretical outline of the basic modular architecture of the human mind and especially the human capacity to understand agency He then goes on to discuss examples of supernatural agency in detail arguing that the human ability to attribute beliefs and desires to others forms the basis of conceptions of supernatural agents and of such social cognition in which supernatural agents are postulated as interested parties in social life Beliefs about supernatural agency are natural says Pyysiainen in the sense that such concepts are used in an intuitive and automatic fashion Two dots and a straight line below them automatically trigger the idea of a face for example Given that the mind consists of a host of such modular mechanisms certain kinds of beliefs will always have a selective advantage over others Abstract theological concepts are usually elaborate versions of such simpler and more contagious folk conceptions Pyysiainen uses ethnographical and survey materials as well as doctrinal treatises to show that there are certain recurrent patterns in beliefs about supernatural agents both at the level of folk religion and of formal theology

Exocet Falklands Ewen

Southby-Tailyour, 2014-04-02 A fascinating account of three SAS missions to counter the Exocet missile from ill thought out ideas to near suicidal one way trips onto enemy soil Soldier Magazine This is a revelatory account of three un tabulated special forces operations PLUM DUFF MIKADO and KETTLEDROM that were tasked to destroy Argentina s Exocet missiles during the 1982 Falkland s campaign Interviews with the SAS officer commanding Operation PLUM DUFF members of the reconnaissance patrol for Operation MIKADO plus the navigator of the helicopter that flew eight troopers into Tierra del Fuego has allowed the author to describe the tortuous events that led instead to a significant survival story The RAF pilots ordered to conduct an assault landing of two Hercules onto Rio Grande air base during Operation MIKADO have spoken of the extraordinary procedures they developed so have the commander of the SBS and the captain of the British submarine involved in Operation KETTLEDROM The Super tendard pilots who sank HMS Sheffield and MV Atlantic Conveyor and then attacked HMS Invincible plus a key member of the Argentine special forces and the brigadier defending Rio Grande add credence depth and gravitas to the saga as does an equally revealing interview with the SIS MI6 officer who led the world wide search for Exocets on the black market Disturbing over confidence by commanders at home was finely counter balanced by stirring accounts of inspiring physical and moral courage across the South Atlantic Exocet Falklands is a ground breaking work of investigative military history from which many salutary lessons can be learned Between politics diplomacy and barbouzeries this well documented work will lead you in the arcane of what should have changed the course of this war Air Fan
