Architecture, forme urbaine et identité collective Luc Noppen, CELAT., Québec (Québec). Centre de développement urbain, 1995 *Figures architecturales, formes urbaines*, 1994 **Figures architecturales, formes urbaines** Association internationale de sémiotique de l'espace. Congrès, 1994 *Bibliographie Genevoise 1995* Société d'histoire et d'archéologie de Genève, Bibliothèque publique et universitaire de Genève, *Advances in Visual Semiotics*, 2011-12-07 No detailed description available for *Advances in Visual Semiotics* *Complex Systems, Smart Territories and Mobility* Patricia Sajous, Cyrille Bertelle, 2021-01-27 This book reflects the outcome of contribution by the plural community and of the interactions between disciplines With the mass of data available through Information and Communication Technologies ICT in an unprecedented quantity since the Human History it is now possible to access dimensions of knowledge that though not hidden could not be grasped in the same way in the past The question of how this information can be used for the benefit of institutional and economic actors to foster the development of a territory Tackling the issue from a resolutely interdisciplinary perspective the authors explore the theories and methods of complex systems in order to discuss how they can contribute in these new circumstances to territorial intelligence and to the development practices in which it is embodied This book illustrates how today's research explores the multiple facets of territorial systems in order to reproduce their richness It invites readers to learn about the challenges ideas results and advances present in this domain **Beyond Gated Communities** Samer Bagaeen, Ola Uduku, 2015-06-12 Research on gated communities is moving away from the hard concept of a gated community to the more fluid one of urban gating The latter allows communities to be viewed through a new lens of soft boundaries modern communication and networks of influence The book written by an international team of experts builds on the research of Bagaeen and Uduku's previous edited publication *Gated Communities* Routledge 2010 and relates recent events to trends in urban research showing how the discussion has moved from privatised to newly collectivised spaces which have been the focal point for events such as the Occupy London movement and the Arab Spring Communities are now more mobilised and connected than ever and *Beyond Gated Communities* shows how neighbourhoods can become part of a global network beyond their own gates With chapters on Australia Canada Europe South America Asia Africa and the Middle East this is a truly international resource for scholars and students of urban studies interested in this dynamic growing area of research *Beiträge Zur 15. Internationalen Konferenz Zu Stadtplanung, Regionalentwicklung und Informationsgesellschaft* Manfred Schrenk, 2010 *The Dynamics of Complex Urban Systems* Sergio Albeverio, Denise Andrey, Paolo Giordano, Alberto Vancheri, 2007-10-16 In recent years it has become increasingly clear that the dynamics of cities can be best captured by looking at them as complex systems governed by many degrees of freedom interacting on different space and time scales in a non linear fashion The evolution of cities is shaped by internal factors e.g. decisions taken by institutions and individuals external causes international economic context and by social development The underlying

processes can be slow or fast acting locally or globally At a different level both European cities and megacities are magnets for immigrants e g countries which have major economical and political problems leading often to phenomena like marginalization or even ghettization and segregation They are also hotbeds of economic political and cultural activity giving rise among other things to relocation and conversion of industries valuation of land and development of new services These phenomena as qualitative changes are opposed to purely quantitative growth processes They are far from being fully understood nor they are captured in validated and complete urban models For most of urban theory hitherto has been based on the assumption of slowly varying spatial and social structures Only recently these assumptions have been questioned giving rise to models employing dissipative dynamics stochastic cellular automata and multi agent models fractal geometry and evolutionary change models and to further mathematically oriented approaches

Architecture, sémiotique et sciences humaines Josep Muntanola i Thornberg, 1997-09 **Semiotik 3. Teilband** Roland Posner, Klaus Robering, Thomas A. Sebeok, 2008-07-14 Keine ausführliche Beschreibung für Semiotik 3 Teilband verfügbar **Signs in Use** Jørgen Dines Johansen, Svend Erik Larsen, 2005-07-26 Signs in Use is an accessible introduction to the study of semiotics All organisms from bees to computer networks create signs communicate and exchange information The field of semiotics explores the ways in which we use these signs to make inferences about the nature of the world Signs in Use cuts across different semiotic schools to introduce six basic concepts which present semiotics as a theory and a set of analytical tools code sign discourse action text and culture Moving from the most simple to the most complex concept the book gradually widens the semiotic perspective to show how and why semiotics works as it does Each chapter covers a problem encountered in semiotics and explores the key concepts and relevant notions found in the various theories of semiotics Chapters build gradually on knowledge gained and can also be used as self contained units for study when supported by the extensive glossary The book is illustrated with numerous examples from traffic systems to urban parks and offers useful biographies of key twentieth century semioticians

Espace centré : figures de l'architecture domestique dans l'Orient méditerranéen, 1987 **LANGAGES SINGULIERS ET PARTAGES DE L'URBAIN** Philippe Boudon, 1999-04-01 Comment appréhender scientifiquement la question de la multiplicité des langages de l'architecture et de l'urbain Des langages liés aux savoirs de l'architecture et de l'urbanisme aux discours sur la ville des vocabulaires spécialisés aux discours savants la négociation parle dans des situations de conception et ou de décisions autant de thèmes de réflexion poursuivis dans cet ouvrage des questionnements très divers pour aborder ces langages de l'architecture et de l'urbain L'imaginaire géographique Mario Bédard, 2012 **Gaston Paris et la philologie romane** Ursula Bähler, 2004 Gaston Paris 1839 1903 grand pionnier de la philologie romane est sans doute l'un des médiévistes français du XIXe siècle les plus cités de nos jours encore Il n'avait jamais fait l'objet d'une étude d'ensemble que propose enfin Ursula Bähler A l'aide notamment de la très riche correspondance du savant elle dialogue des aspects centraux de la vie et de l'œuvre de Gaston Paris Elle s'interroge ainsi tant

sur le devenir complexe du philologue souvent d'inform par l'historiographie officielle que sur les mécanismes mis en oeuvre par Gaston Paris et ses collègues pour professionnaliser la nouvelle discipline romane germanique dans un climat fortement imprégné des tensions franco-allemandes. L'univers intellectuel du savant ainsi que son attitude vis-à-vis du moyen âge et de sa littérature sont ensuite examinés. L'auteur enfin répond une question essentielle en quoi l'oeuvre et la pensée de Gaston Paris nous concernent-elles encore. En annexe on trouvera la réimpression de la Bibliographie des travaux de Gaston Paris établie en 1904 par Joseph Bédier et Mario Roques.

Can there be freedom without memory Is architecture necessary for freedom and memory or is the total dissociation between freedom memory architecture and writing something positive for humanity Some announce a disappearance of memory and writing as memory but I cannot stop thinking that this conclusion was always reached by all the conservative thinkers facing an important cultural change and there has always emerged a new memory a new writing a new architecture and a new freedom I do not see that human life is possible without freedom without a type of writing of architecture of memory

Mario Botta Irena Sakellaridou, 2000 This volume presents the work of the Swiss born architect who worked as an assistant to such architecture giants as Le Corbusier and Louis I Kahn before starting his own firm in 1970 and achieving international fame Botta's characteristic respect for topographical conditions and regional sensibilities his deft craftsmanship and the importance of geometric order in his work are evidenced in thirty projects that range from smaller residential buildings to such grandiose projects as the Church of San Giovanni Battista the Jean Tinguely Museum and most famously the San Francisco Museum of Modern Art This detailed study also includes the designs he created for furniture and the stage

Mario Botta Architectural Poetics is a thorough survey of the architectural and design work that launched Botta into the pantheon of modern architecture
