## **Figures Of Architecture And Thought German Architecture Culture 1880 :**

Figures of Architecture and Thought Francesco Dal Co,1990      **German Architecture for a Mass Audience** Kathleen James-Chakraborty,2002-09-06 This book vividly illustrates the ways in which buildings designed by many of Germany's most celebrated twentieth century architects were embedded in widely held beliefs about the power of architecture to influence society German Architecture for a Mass Audience also demonstrates the way in which these modernist ideas have been challenged and transformed most recently in the rebuilding of central Berlin      German Art 1907-1937 Martin Ignatius Gaughan,2007 This book examines the responses of visual artists including architects designers and photographers to the technological and social modernisation of Germany during the first three decades of the twentieth century It investigates how these aspects of the modernising process inform both the subject matter and formal innovations of their work The study analyses how these visual practices were not just the concerns of isolated and enclosed art worlds but had wider social resonances ranging from the debates concerning the reformist objectives of the Deutscher Werkbund 1907 to the National Socialist ideological onslaught on modernist culture culminating in the Entartete Kunst Degenerate Art exhibitions of 1937 Many of the artists encountered here were radicalised by the First World War the Russian Revolution and the November 1918 Revolution in Germany experiences which effected change in their conceptualising of cultural production and its social function their modes of working however would also set challenging markers for what forms art might take for the twentieth century The book is therefore both a study of art in complex political and sociocultural contexts and a reflection on how engagement with a social imagination can challenge a tradition based on the assumptions of individual imaginings      Walter Benjamin and the Arcades Project Beatrice Hanssen,2006-07-27 One of the most significant cultural documents of the Weimar Republic and Nazi era Walter Benjamin's unfinished Arcades Project has had a remarkable impact on present day cultural theory urban studies cultural studies and literary interpretation Originally designed as a panoramic study chronicling the rise and decline of the Parisian shopping arcades Benjamin's work combines imaginative peregrinations through the changing city scape of nineteenth century Paris with passages that read like a blueprint for a new cultural theory of modernity Walter Benjamin and the Arcades Project provides the first comprehensive introduction to this extraordinary work accessible to English language readers The diverse range of issues explored include the nature of collecting the anatomy of melancholy the flaneur the physiognomy of ruins the dialectical image Benjamin's relation to Baudelaire the practice of history writing and modernity and architecture Contributors include Susan Buck Morss Stanley Cavell Jonathan Culler Brigid Doherty Barbara Johnson Esther Leslie Gerhard Richter Andrew Benjamin Howard Caygill Beatrice Hanssen Detlef Mertins Elissa Marder Tyrus Miller and Irving Wohlfarth      Building Desire George Dodds,2005-08-08 An in depth look at the unique Barcelona Pavilion its many and complex identities through history and its enduring appeal      The Ethical Function of Architecture Karsten Harries,1998-07-31 Can architecture help us find our place and way in today's complex

world Can it return individuals to a whole to a world to a community Developing Giedion's claim that contemporary architecture's main task is to interpret a way of life valid for our time philosopher Karsten Harries answers that architecture should serve a common ethos But if architecture is to meet that task it first has to free itself from the dominant formalist approach and get beyond the notion that its purpose is to produce endless variations of the decorated shed In a series of cogent and balanced arguments Harries questions the premises on which architects and theorists have long relied premises which have contributed to architecture's current identity crisis and marginalization He first criticizes the aesthetic approach focusing on the problems of decoration and ornament He then turns to the language of architecture If the main task of architecture is indeed interpretation in just what sense can it be said to speak and what should it be speaking about Expanding upon suggestions made by Martin Heidegger Harries also considers the relationship of building to the idea and meaning of dwelling Architecture Harries observes has a responsibility to community but its ethical function is inevitably also political He concludes by examining these seemingly paradoxical functions

*Émigré Cultures in Design and Architecture* Alison J. Clarke, Elana Shapira, 2017-11-02 This new volume addresses the lasting contribution made by Central European migr designers to twentieth century American design and architecture The contributors examine how oppositional stances in debates concerning consumption and modernism's social agendas taken by designers such as Felix Augenfeld Joseph Binder Josef Frank Paul T Frankl Frederick Kiesler Richard Neutra and R M Schindler in Europe prefigured their later adoption or rejection by American culture They argue that migr s and refugees from fascist Europe such as Gyrgy Kepes Paul L szl Victor Papanek Bernard Rudofsky Xanti Schawinsky and Eva Zeisel drew on the particular experiences of their home countries and networks of migr and exiled designers in the United States to develop a humanist progressive and socially inclusive design culture which continues to influence design practice today

**From Object to Experience** Harry Francis Mallgrave, 2018-06-28 Harry Francis Mallgrave combines a history of ideas about architectural experience with the latest insights from the fields of neuroscience cognitive science and evolutionary biology to make a powerful argument about the nature and future of architectural design Today the sciences have granted us the tools to help us understand better than ever before the precise ways in which the built environment can affect the building user's individual experience Through an understanding of these tools architects should be able to become better designers prioritizing the experience of space the emotional and aesthetic responses and the sense of homeostatic well being of those who will occupy any designed environment In *From Object to Experience* Mallgrave goes further arguing that it should also be possible to build an effective new cultural ethos for architectural practice Drawing upon a range of humanistic and biological sources and emphasizing the far reaching implications of new neuroscientific discoveries and models this book brings up to date insights and theoretical clarity to a position that was once considered revolutionary but is fast becoming accepted in architecture

*The Emergence of the Interior* Charles Rice, 2006-11-22 Taking a radical position counter to many previous histories and theories of the

interior domesticity and the home The Emergence of the Interior considers how the concept and experience of the domestic interior have been formed from the beginning of the nineteenth century It considers the interior s emergence in relation to the thinking of Walter Benjamin and Sigmund Freud and through case studies in architecture s trajectories toward modernism The book argues that the interior emerged with a sense of doubleness being understood and experienced as both a spatial and an image based condition Incorporating perspectives from architecture critical history and theory and psychoanalysis The Emergence of the Interior will be of interest to academics and students of the history and theory of architecture and design social history and cultural studies

*Time's Visible Surface* Michael Gubser, 2006-01-09 Expands our understanding of Alois Riegl beyond his role as an art historian to a pivotal figure in cultural theory at large while placing his interest in history and time within the intellectual world of fin de si cle Vienna Alois Riegl s art history has influenced thinkers as diverse as Erwin Panofsky Georg Lukacs Walter Benjamin Paul Feyerabend Gilles Deleuze and F lix Guattari One of the founders of the modern discipline of art history Riegl is best known for his theories of representation Yet his inquiries into the role of temporality in artistic production including his argument that art conveys a culture s consciousness of time show him to be a more wide ranging and influential commentator on historiographical issues than has been previously acknowledged In *Time s Visible Surface* Michael Gubser presents Riegl s work as a sustained examination of the categories of temporality and history in art Supported by a rich exploration of Riegl s writings Gubser argues that Riegl viewed artworks as registering historical time visibly in artistic forms Gubser s discussion of Riegl s academic milieu also challenges the widespread belief that Austrian modernism adopted a self consciously ahistorical worldview By analyzing the works of Riegl s professors and colleagues at the University of Vienna Gubser shows that Riegl s interest in temporality from his early articles on calendar art through later volumes on the Roman art industry and Dutch portraiture fit into a broad discourse on time history and empiricism that engaged Viennese thinkers such as the philosopher Franz Brentano the historian Theodor von Sickel and the art historian Franz Wickhoff By expanding our understanding of Riegl and his intellectual context *Time s Visible Surface* demonstrates that Riegl is a pivotal figure in cultural theory and that fin de si cle Vienna holds continued relevance for today s cultural and philosophical debates

Rahmani,2015-01-02

Adopting Kafka as a lens to examine modern concepts in architecture this book pries open new interpretations in Kafka scholarship Each of eight chapters takes up an architectural element with which to explore meanings central to both literature and architecture Stairs function as vertical access but in Kafka s hands become an instrument of science testing the merit of natural selection Kafka s doors open and close less to allow passage than to reconcile one psychological interior

with the next Notions of plumbing and hygiene begin to acquire new meaning The architecture of Mies van der Rohe begins to make more sense especially his tabula rasa approach to design signifying less a harsh disdain for site and more a response to a reality in which the ceremony of the stairs had died and was replaced by the pervasive flatness of the modern floor
