Less well known even to avid horror fans are the many other memorable films based on literary works. Beginning in the silent era and continuing to the present, numerous horror films found their inspiration in novels, novellas, short stories, and poems, though many of these written works are long forgotten. This book examines 43 works of literature from the famous to the obscure that provided the basis for 62 horror films. Both the written works and the films are analyzed critically with an emphasis on the symbiosis between the two. Background on the authors and their writings is provided.

Horror Films James B. Weaver, Ron Tamborini, 2013-11-05 Why do so many of us enjoy being told frightening stories? What are some of the consequences that result from such exposure? In light of the considerable popularity of horror films over the last three decades, these questions have become the focus of growing attention for many scholars. However, research on audience preferences for and reactions to horror films has been performed eclectically by investigators from varied theoretical and methodological backgrounds. As a result, the information has not been effectively integrated. This volume was written to address this problem and to position the study of audience responses to frightening fiction as a significant research topic.
