Kennett,Bruce Winterhalder,2006-01-02 For the newcomer to the literature and logic of human behavioral ecology this book is a flat out bonanza entirely accessible self critical largely free of polemic and above all stimulating beyond measure It s an extraordinary contribution Our understanding of the foraging farming dynamic may just have changed forever David Hurst Thomas American Museum of Natural History **Leaving Mesa Verde** Timothy A. Kohler,Mark D. Varien,Aaron M. Wright,2013-11-15 It is one of the great mysteries in the archaeology of the Americas the depopulation of the northern Southwest in the late thirteenth century AD Considering the numbers of people affected the distances moved the permanence of the departures the severity of the surrounding conditions and the human suffering and culture change that accompanied them the abrupt conclusion to the farming way of life in this region is one of the greatest disruptions in recorded history Much new paleoenvironmental data and a great deal of archaeological survey and excavation permit the

fifteen scientists represented here much greater precision in determining the timing of the depopulation the number of people affected and the ways in which northern Pueblo peoples coped and failed to cope with the rapidly changing environmental and demographic conditions they encountered throughout the 1200s In addition some of the scientists in this volume use models to provide insights into the processes behind the patterns they find helping to narrow the range of plausible explanations What emerges from these investigations is a highly pertinent story of conflict and disruption as a result of climate change environmental degradation social rigidity and conflict Taken as a whole these contributions recognize this era as having witnessed a competition between differing social and economic organizations in which selective migration was considerably hastened by severe climatic environmental and social upheaval Moreover the chapters show that it is at least as true that emigration led to the collapse of the northern Southwest as it is that collapse led to emigration

Archaeology of the Appalachian Highlands Lynne P. Sullivan, Susan C. Prezzano, 2001 This volume is a major synthesis of the archaeology of the Appalachian region and includes much material that was previously unpublished or underpublished The information and interpretations presented will be very useful for archaeologists working in eastern North America who are interested in this diverse region C Clifford Boyd Jr Radford University *Archaeology of the Appalachian Highlands* reveals that every part of Appalachia yields archaeological evidence significant to understanding the broad prehistoric sweep of the American Indians In this most welcome volume editors Lynn Sullivan and Susan Prezzano have assembled the most current interpretations of archaeological theory technology and cultural history as these occur in the highlands of eastern North America This volume to shatter myths about Appalachian and its past David S Brose Director Schiele Museum of Natural History Arkansas Archaeology Robert C. Mainfort, Marvin D. Jeter, Dan F. Morse, Phyllis A. Morse, 1999-11-01 Arkansas has long been recognized as a state with a rich archaeological heritage that is unsurpassed in North America The Toltec Mounds were made famous by the Smithsonian's research at the turn of the century The Sloan site dated to 8500 B C is the oldest documented burial ground in the New World The alluvial plain of the central Mississippi River valley supported perhaps the greatest prehistoric urban population And the Parkin site has yielded important information about the de Soto incursion into the continent This festschrift recognizes the contributions made in researching this varied heritage by Dan and Phyllis Morse from the inception of the Arkansas Archeological Survey in 1967 to their retirement in 1997 The essays were prepared by thirteen of their colleagues recognized experts in archaeology and related fields and represent state of the art knowledge about Arkansas's archaeology The topics range broadly from prehistoric environments and regional syntheses to specialized studies of specific culture periods and historical archaeology Paul and Hazel Delcourt and Roger Saucier provide a chapter that will serve as a standard reference for many years on Holocene environments Chris Gillam's contribution demonstrates the utility of Geographic Information Systems in broad scale pattern analysis Robert Mainfort uses large collections of ceramics to show that traditional methods for grouping Late Mississippian sites are insufficient Michael

Hoffman introduces a new line of evidence from old newspaper accounts and Frank Schambach in reinterpreting the spectacular Spiro site in eastern Oklahoma gives us a powerful classic example of archaeological and ethnohistoric interpretation This volume will of course be of great interest to professional archaeologists and anthropologists but the essays are also accessible to students amateur archaeologists historians and enthusiastic general readers As the new millennium dawns this book celebrates the legacy of two very distinguished careers in archaeology and heralds the proliferation of innovative new approaches and techniques for the continuing study of Arkansas s prehistoric peoples

This Land of Shining Mountains E. Steve Cassells, 2000 **Architect**, 1906 **Archaeology, History, and Predictive Modeling** David G. Anderson, Steven D. Smith, 2003-08-20 Fort Polk Military Reservation encompasses approximately 139 000 acres in western Louisiana 40 miles southwest of Alexandria As a result of federal mandates for cultural resource investigation more archaeological work has been undertaken there beginning in the 1970s than has occurred at any other comparably sized area in Louisiana or at most other localities in the southeastern United States The extensive program of survey excavation testing and large scale data and artifact recovery as well as historic and archival research has yielded a massive amount of information While superbly curated by the U S Army the material has been difficult to examine and comprehend in its totality With this volume Anderson and Smith collate and synthesize all the information into a comprehensive whole Included are previous investigations an overview of local environmental conditions base military history and architecture and the prehistoric and historic cultural sequence An analysis of location environmental and assemblage data employing a sample of

more than 2 800 sites and isolated finds was used to develop a predictive model that identifies areas where significant cultural resources are likely to occur Developed in 1995 this model has already proven to be highly accurate and easy to use Archaeology History and Predictive Modeling will allow scholars to more easily examine the record of human activity over the past 13 000 or more years in this part of western Louisiana and adjacent portions of east Texas It will be useful to southeastern archaeologists and anthropologists both professional and amateur David G Anderson is an archaeologist with the National Park Service s Southeast Archeological Center in Tallahassee Florida and coeditor of The Woodland Southeast Steven D Smith is with SCIAA in Columbia South Carolina J W Joseph and Mary Beth Reed are with New South Associates in Stone Mountain Georgia
