with five papers which review current knowledge in important fields the rhizosphere molecular biology electron microscopy
location and function of elements in vivo and modelling nutrient responses in the field These themes are continued in groups
of shorter papers which follow In addition there are sections on nutrient dynamics and partitioning diagnostic techniques
plant survival strategies mycorrhizas and on nutrients such as P N S K Ca Mg and micronutrients A large section is devoted
specifically to boron reflecting the considerable current interest in this element In total there are 177 refereed papers
