Technospaces Sally Munt, 2001-06-20 Science and technology have had a profound effect on the way humans perceive space and time In this book an international team of authors explore themes of depth and surface of real and conceptual space and of human machine interaction The collection is organized around the concept of Technospace the temporal realm where technology meets human practice In exploring this intersection the contributors initiate debate on a number of important conceptual questions Is there a clear distinction between the real spaces of the body or the city and the conceptual space of virtual reality How are real and metaphorical spaces of electronic cultures quantified and regulated Is there an ethics of technospace Historically the reception of new technologies has been invested with romantic idealism on the one hand and panic on the other The authors argue that in order for utopian dreams to be tempered by ethical humanistic needs we have an urgent need to reveal reflect upon and evaluate technospace and our relationship to it

Organizational Evolution and Strategic Management Rodolphe Durand, 2006-04-25 I have no doubt this book will be read and used time and again by any scholar working within the evolutionary approach to organizations I believe that it will also be of great interest to strategy scholars Management Rodolphe Durand has a compelling message for the growing community of evolutionary researchers in organization studies Evolutionary researchers need to attend more carefully to historical and contemporary debates in the biological sciences if they are to avoid false tracks and simplistic analogies Durand offers here the foundations of a distinctive and authentic evolutionary theory that takes organizations seriously for what they are Richard Whittington Oxford University This book fills an important gap in the study of organizations and strategy from an evolutionary perspective It offers a synthetic approach to evolutionary analysis with grounded empirical examples that graduate students and seasoned scholars alike will find immensely useful Durand's OES model rooted in a critical examination of philosophical and scientific writings on evolution is particularly promising and provides a valuable guidepost for future research on organizations and strategic management Michael Lounsbury University of Alberta How is economic

evolutionary theory in which organisations evolve according to environmental selection reconciled with evidence of strategic management This book is the first of its kind to propose a solution to this theoretical puzzle and engage readers in a balanced understanding of organizational evolution Rodolphe Durand embarks upon a fresh assessment of the literature His discoveries provide the foundation for a new theory of organizational selection and an organizational evolution and strategy model that reconciles economic evolution with strategic intentionality Chapters include an examination of the work by Lamarck Darwin and Spencer a constructive appraisal of evolutionary theory applied to organisations and a summary of how the organizational evolution and strategy model will affect future theory and research An associated web site with further information can be found at <http://studies.hec.fr/web/durand>

the person chapter two is devoted to the change process within the client including a very accessible description of Rogers process model Chapter three goes on to explore why and how change occurs in the human being while chapter four introduces the most up to date person centred theory in relation to the nature of the self concept and its changing process Chapters five and six explore why change occurs in therapy and the conditions that facilitate that change while chapter seven looks beyond the core conditions to focus on the particular quality of presence begging the question as to whether this is a transpersonal transcendental quality or an intense experiencing of the core conditions themselves This is an intensely modern book particularly in its postmodern emphasis Rogers is sometimes characterised as coming from modernist times but he can also be seen as one of the early post modernists in his emphasis on process more than outcome and relationship more than personal striving The modern nature of the book is also emphasised by a superb analysis of the relationship between focussing and person centred therapy in Chapter five linking also with Polanyi s notion of indwelling in this and other chapters In suggesting that in both focussing and person centred therapy the therapist is inviting the client to indwell himself or herself the author provides a framework for considering many modern perceptions of the approach including notions such as presence and relational depth Also the link with focussing is modern in the sense that the present World Association for the approach covers a fairly broad family including traditional person centred therapists experiential therapists focussing oriented therapists and process guiding therapists Important in this development is the kind of dialogue encouraged by the present book Dave Mearns Strathclyde University The belief that change occurs during the therapeutic process is central to all counselling and psychotherapy The Person Centred Approach to Therapeutic Change examines how change can be facilitated by the counsellor offering empathy unconditional positive regard and congruence The Person Centred Approach to Therapeutic Change outlines the main theoretical cornerstones of the person centred approach and then applying these describes why change occurs as a result of a person centred therapeutic encounter The author explores the counselling relationship as an environment in which clients can open themselves up to experiences they have previously found difficult to acknowledge and to move forward Integral to the person centred approach is Carl Rogers radical view that change should be seen as an ongoing process rather than an alteration from one fixed state to another In Rogers view psychological health is best achieved by the person who is able to remain in a state of continual change Such a person is open to all experiences and is therefore able to assimilate and adapt to new experiences whether good or bad By focusing explicitly on how change is theorized and facilitated in counselling this book goes to the heart of person centred theory and practice making it essential reading for trainees and practitioners alike

Electromagnetic Cascade and Chemistry of Exotic Atoms D.

Horváth, L.M. Simons, G. Torelli, 2013-12-14 This Workshop was organized to bring once more together the scientists of the rather heterogeneous field of exotic atoms At present the main topic of the field seems to be the study of the atomic cascade There are some who study it intentionally let us call them cascadeurs and others who think they investigate other features of

the exotic atoms like Coulomb capture particle transfer muon catalyzed fusion chemical effects fundamental properties etc users while in fact they study some special consequences of the same atomic cascade We decided to get cascadeurs and users discuss the problems of exotic atoms at wonderful Erice at the 5th Course of the International School of Physics of Exotic Atoms Our Workshop was quite successful we have heard excellent talks from participants from a dozen countries and most of them have prepared written contributions for this volume The Organizers express their gratitude to all participants for their contributions especially to David Measday for his concluding remarks not printed here and to James Cohen for jumping in for Leonid Ponomarev who had to leave unexpectedly in the middle of the meeting We greatly appreciate the enthusiastic help of Marianne Signer in every stage of the organization work And of course the Workshop could not happen at all without the incredibly efficient organization by the Ettore Majorana Centre of Scientific Culture Leopold M Simons Dezs Horvath Gabriele Torelli V
