Business concepts are presented in such a way as to introduce the reader to the business contexts in which accounting functions. Cognitive Requirement of Accounting Tasks Yijun Zhou, 2022-06-23 Competence orientation has become a defining element of vocational education in German-speaking countries. In this context, tasks are considered the transmission belts to implement the reformed educational standards. In her dissertation, the author takes a view on the systematic analysis of task characteristics as a method to inspect the degree of tasks' cognitive requirements. The theoretical conceptual part of the dissertation gives a psychological and didactical justification of the principles underlying the tasks' cognitive requirement. The effects are analysed in two empirical studies. The first study takes a look on the basis of accounting tasks from Chinese vocational school textbooks using the structuring content analysis (Mayring 2008). The second empirical study inspects accounting teachers' perceptions and judgments by interviews. Based on the results, the author develops suggestions for the use of the concept of tasks' cognitive requirement in the didactic training of prospective teachers at commercial schools. *The Education Index*, 1957 *Daily Graphic* Ransford Tetteh, 2010-09-14
