The Promise and Perils of

**Transnationalization** Benjamin Stachursky, 2013 To date most constructivist international relations studies have characterized the influence of transnationalism on domestic forms of activism as uniformly positive In particular transnational interactions are viewed as positive factors for the development and daily impact of gender activism Benjamin Stachursky's book questions the unvarying positive view of transnationalism on domestic forms of activism arguing for a more nuanced analysis that permits an understanding of the enabling and restricting effects of transnationalism Stachursky also challenges the dominant view of civil society as normatively homogenous by illustrating the complex relationships and conflicts that exist between NGOs and other civil society representatives He grounds his theoretical arguments with a comparative case study on women s rights activism in Egypt and Iran which uses semi structured interviews with women s rights activists in the two countries and analysis of documentation by local political and societal actors Looking at the period from the mid 1980s up to present developments such as the Arab Spring Stachursky analyzes the emergence and development of NGO activism in Egypt and Iran the social political and legal context of NGO activism and key domestic debates on the impact and legitimacy of the actors operating in women's rights activism By closely examining the ambivalent relationship between transnationalism and human rights organizations Stachursky proves that transnationalization has both enabling and constraining effects on the domestic legitimacy of women's rights activists and on their ability to create meaningful social and political change Technology and Innovation in Learning, Teaching and Education Arsénio Reis, José P. Cravino, Leontios Hadjileontiadis, Paulo Martins, Sofia B. Dias, Sofia Hadjileontiadou, Tassos Mikropoulos, 2025-08-21 The

The biases identified by the authors in the various chapters

are the deflationary bias male breadwinner bias and commodification bias adding two new biases risk bias and creditor bias. The originality of the book is that its primary focus is on macroeconomic policies fiscal and monetary and financial governance from a feminist perspective with a focus on the gross domestic product and its fluctuations and growth paid employment and inflation the budget surplus deficit levels of government expenditure and tax revenue and supply of money. The central findings are that the key instruments of financial governance are not gender neutral Each chapter considers examples of financial governance and how it relates to the gender order including divisions of labour and relations of power and privilege. This book is key reading for anyone studying feminist economics and should also be of interest to those researching macroeconomics political economics and women s studies.
