Trade Infrastructure and Economic Development David Olusanya Ajakaiye, T. Ademola Oyejide, 2012-03-12 There is growing consensus in the literature that trade and trade policy matter for a pro poor growth and development strategy Therefore policies that are consistent with this strategy feature increasingly in many African countries where poverty is endemic and rapid and where sustainable economic growth is viewed

as the major vehicle for poverty reduction Key elements of these policies include measures that promote the expansion and diversification of production and trade in Africa This book is aimed at articulating appropriate structural and policy measures for eliminating the constraints that African countries face and thus ensuring that they can derive maximum benefits from all available market access opportunities There is evidence that most African countries face external market access barriers in their major export destinations which are generally less constraining than those confronting countries in other developing country regions Yet they have generally not been able to take full advantage of the special preferential market access opportunities available to them This suggests that improved external market access whether reciprocal or preferential would not by itself be sufficient for strengthening African export performance In this collection export supply response capacity takes external beyond the border factors as given and concentrates primarily on the internal behind the border factors that influence production and distribution costs and thus competitiveness The central working hypothesis of this book is that the inability of domestic producers and exporters in Africa to respond quickly effectively and efficiently to external market access opportunities is caused by various limitations of their internal supply capacity and that this in turn is largely responsible for the lacklustre export performance of many African countries This comprehensive study should be of interest to students and researchers of international trade and development economics as well as African studies

Developmental Macroeconomics Luiz Carlos Bresser-Pereira, José Luís Oreiro, Nelson Marconi, 2014-09-04 Developmental Macroeconomics Access to Demand the Exchange Rate and Growth offers a new approach to development economics and macroeconomics It is a Keynesian structuralist approach to economics applied to middle income countries that emphasizes the strategic role of demand in creating investment opportunities that are essential to economic development It also explores crucial links between short term full employment and financial stability with medium term growth While this book emphasizes the central role played by the exchange rate it does not ignore other macroeconomic prices the interest rate the inflation rate and the profit rate It develops a group of concepts and models and blends them together in the model of the tendency to the cyclical overvaluation of the exchange rate in

developing countries According to this model the exchange rate tends to be chronically overvalued In so far that this is true the exchange rate ceases to be just a short term problem to be treated by macroeconomics and becomes central to development economics and should be crucially oriented to manage the exchange rate and keep it competitive at the industrial equilibrium level The book closes with the presentation of new developmentalism a national development strategy based on the system of models previously discussed that is both an alternative to old national developmentalism and to liberal orthodoxy or the Washington consensus
