**Financial Globalization and the Opening of the Japanese Economy** James P. Malcolm, 2013-07-04 This book investigates recent changes in Japan's financial system and looks at the implications for Japan's particularistic model of political economy. Drawing on the latest theoretical research, it seeks to determine how Japan's experience resembles patterns which many scholars in the West have associated with financial globalization as a powerful force for conveyance. The book sets out the background and examines the progression of financial deregulation in Japan, culminating in the Big Bang programme of financial reform set in motion in November 1996. It analyses developments in the financial sector to gauge the extent to which Japanese financial institutions are falling into line with emerging norms of organization and strategic management. It also examines the implications for the corporate and household sectors stemming from the government and financial sectors' partial embrace of financial globalization.

**Japanese Capitalism and Modernity in a Global Era** Peter Matanle, 2003-09-02 First Published in 2004 This book provides an in-depth examination of one of the most central and defining aspects of capitalist modernity in contemporary Japan: the lifetime employment system. It investigates the key themes surrounding the system, including the work attitudes and values of Japanese company employees and whether or not Japan is converging on Western forms of

capitalist organisation Peter Matanle presents and analyses original documentary data drawn from extensive research within four large Japanese corporations in order to explore these issues from the perspective of both management and employees. The findings are then discussed in terms of the development of Japan's capitalism and modernity. It will be of interest to researchers of Japanese studies, Business studies and Sociology.

**Japan and Okinawa** Glen D. Hook, Richard Siddle, 2003-08-29 Japan and Okinawa provides an up to date coherent and theoretically informed examination of Okinawa from the perspective of political economy and society. It combines a focus on structure and subjectivity as a way to analyze Okinawa, Okinawans and their relationship with global, regional and national structures. The book draws on a range of disciplines to provide new insights into both the contemporary and historical place of Okinawa and the Okinawans. The first half of the book examines Okinawa as part of the global, regional and national structures which impose constraints as well as offer opportunities to Okinawa. Leading specialists examine in detail topics such as Okinawa as a frontier region, Okinawa's Free Trade Zones and response to globalization and Okinawa as part of the Japanese construction state, being particularly concerned with how Okinawa can chart its own course. The second half focuses on questions of identity and subjectivity, examining the multitude of vibrant cultural practices that breathe life into the meaning of being Okinawan and inform their social and political responses to structural constraints. The originality of this book can be found in its elucidation of how the structural constraints of Okinawa's precarious position in the world, the region and as part of Japan impact on subjectivity. For many Okinawans in the past as now, acceptance and rationalization of their dependency has made them collaborators in their own subordination. At the same time, however, they have demonstrated a capacity to give voice to a separate identity, inscribing cultural practices marking them as different from mainland Japanese.

Jang-Sup Shin, 2007-08-07 East Asia has in many ways been the cockpit of the globalization process. If the phenomenon as it is generally defined is largely recognized as a relatively recent one, the countries that have experienced most change during this period have been in the region. Rapid economic growth leading to the Tigers label was followed by financial crisis and partial recovery. Underlying this has been the remarkable success story of Japan since the Second World War followed by the current seemingly inexorable progress of China towards centrality on the world stage. Jang Sup Shin has amassed an international team of contributors to shed light on how the various Asian countries have responded to the globalization process. These include James Crotty, Lu Ding and Ha Joon Chang.

The United States, the European Union, and the Globalization of World Trade Thomas C. Fischer, 2000-04-30 Professor Fischer presents a comprehensive overview of global trade at the start of a new century from a national regional and international viewpoint He looks closely at the four dominant and competing economic systems the United States the European Union Japan and China and argues that the traditional we win you lose national trade paradigm has been replaced by one that is more collaborative one that is leaning toward de facto world governance He compares foreigners attitudes toward trade and markets with our own using four economic models that typify world trade today He examines the interface between national regional and international trading systems and between business and government then at the prospect of global trade management in different trade sectors under the GATT WTO and other organizations The result is a provocative discussion of global trade today Professor Fischer makes it clear that the United

States needs allies Though its influence in the world trade arena will continue America s hegemony has ended The European Union is America s most obvious ally but it has many problems and ambitions of its own The North American Free Trade Agreement has solidified the North American market but it may isolate and lose South America while Japan China Russia and others are left to develop alliances of their own All these factors raise important global questions among them Can American capitalism prevail Should the United States proceed unilaterally as it has so often Or are regional and multinational arrangements preferable If there is further globalization as seems inevitable and if American influence is on the wane what group or organization will lead To explore these questions and provide the beginnings of answers Professor Fischer uses his four competing economic systems and handicaps the process country by country sector by sector with particular attention to transatlantic relations

*GLOBALIZATION AT THE BEGINNING OF THE 21st CENTURY* José María Franquet Bernis, 2021-04-23

Globalization as the dominant force that it is in the last decade of the 20th century and the beginning of the 21st has shaped a new era in the interaction between nations, economies and peoples. But it has also fragmented production processes, labor markets, political entities and societies. At the supranational level, there is no political and regulatory counterweight to monitor this process and correct in a fair and equitable way the dangerous abuses that may derive from it. The logic of the global economy is deeply contradictory. It is based on the bases of speed, risk, creativity but also on impunity in the international order since there are no mechanisms to regulate and control the collective interests of humanity. But above all, this logic is installed on the principle of the insecurity of people, particularly those in poor countries and sectors. Production is transferred from high wage countries to those with low wages without entailing benefits for those countries; speculation is carried out in the financial market without considering the dangerous consequences except for capital itself; cultural and consumption patterns are disrupted and irreversible damage occurs to the ecological base of the planet without concern for future generations.
