the world Pentecostalism accommodates to the world and modernity It transcends locality by promulgating a universal imaginary of the world while at the same time incorporating itself successfully into the socio cultural contexts of any new cultures it encounters The fundamental fluidity of the transnational Pentecostal network is conducive for its flexibility to react on the enormous upheavals and changes in a globalized world and to accommodate to them in constructive ways Thus Pentecostalism can be regarded as a paradigmatic case of a glocalized religion it has the ability to adapt itself to local conditions while maintaining and preserving its distinct religious features at the same time This study focuses on the different theoretical attempts made to explain the massive global expansion of Pentecostalism and its relation to broader processes of globalization It discusses to what extent and in what complex ways the Pentecostal movement is interrelated to processes of cultural globalization By looking at the internal religious characteristics of Pentecostal discourse and discursive practices and their articulations within the external circumstances of globalization it tries to untangle some of the complexities that emerge when theorizing the globalization of Pentecostalism
