Accounting, Organizations, and Institutions Christopher S. Chapman, David J. Cooper, Peter Miller, 2009-08-13 Accounting has an ever increasing significance in contemporary society Indeed some argue that its practices are fundamental to the development and functioning of modern capitalist societies We can see accounting everywhere in organizations where budgeting investing costing and performance appraisal rely on accounting practices in financial and other audits in corporate scandals and financial reporting and regulation in corporate governance risk management and accountability and in the corresponding growth and influence of the accounting profession Accounting too is an important part of the curriculum and research of business and management schools the fastest growing sector in higher education This growth is largely a phenomenon of the last 50 years or so Prior to that accounting was seen mainly as a mundane technical bookkeeping exercise and some still share that naive view The growth in accounting has demanded a corresponding engagement by scholars to examine and highlight the important behavioural organizational institutional and social dimensions of accounting Pioneering work by accounting researchers and social scientists more generally has persuasively demonstrated to a wider social science professional management and policy audience how many aspects of life are indeed constituted to an important extent through the calculative practices of accounting Anthony Hopwood to whom this book is dedicated has been a leading figure in this endeavour which has effectively defined accounting as a distinctive field of research in the social sciences The book brings together the work of leading international accounting academics and social scientists and demonstrates the scope vitality and insights of contemporary scholarship in and on accounting and auditing Accountants' Handbook, Special Industries and Special Topics D.
