Skully, 1984-06-18 **Monetary Policy in Pacific Basin Countries** Hang-Sheng Cheng, 2012-12-06 The chapters in this book are based on papers prepared for a conference organized by the Federal Reserve Bank of San Francisco held at the bank September 23 25 1987 to review and compare monetary policy experiences of Pacific Basin countries during the past 15 years The theme of the conference was conceived with two purposes in mind First there was and still is a great need to enhance knowledge on the workings of economies in the Pacific Basin which has been the fastest growing region in the world economy during the past 30 years While much has been written on Pacific Basin trade and economic growth relatively few studies have been published on the conduct of monetary policy in these economies Second as we in the United States and others elsewhere have learned rapid financial market changes over the last 15 years have led to considerable adjustment in the conduct of monetary policy A comparative study of various national experiences can yield insights into the inter actions between monetary policy and financial market changes more than is obtainable by examining individual national experiences separately **Financial Institutions and Policies in Indonesia** Anwar Nasution, 1983 Includes bibliographies **State Structure, Policy Formation, and Economic Development in Southeast Asia** Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don't What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future **ASEAN Financial Co-Operation** Michael T. and revive domestic economies This book offers in depth region specific economic policy discourse that illuminates how a policy push is at work in the region and sheds light on room for strengthening regional cooperation This book aims to 1 discuss the developments of macroeconomic and trade policy mix against the backdrop of the eurozone sovereign debt crisis and economic prospects for major countries in Southeast Asia i e Singapore Thailand Malaysia Indonesia and Vietnam 2 assess the effectiveness of policy responses to the global economic unrest 3 identify opportunities and challenges facing Southeast Asia in the midst of the global economic slump when developing Southeast Asia leverages on an ever expanding role in the global business environment 4 rethink the East Asian model of growth where enormous gains were driven principally by export demands from advanced economies and 5 pioneer the key areas of regional cooperation and macroeconomic and trade policy reforms that may potentially strengthen regional economies
