Measuring Willingness to Pay for Electricity Peter Choynowski,2008-05 The measurement of willingness to pay for electricity relies critically on a reliable estimate of the demand for electricity function Empirical work tends to assume that the demand for electricity has no satiation point Many electricity demand models assume a constant price elasticity which implies infinite demand at low prices This report proposes a plausible functional form for the demand of electricity The proposed functional form is consistent with two properties of electricity demand functions for households firms namely the negative relationships between price quantity the finiteness of demand at zero price The report also demonstrates that this functional form of the demand function leads to easily estimable economic benefits of electricity Why Are Some Countries Richer Than Others? Jesus Felipe,2008-10 Provides evidence of a problem with the influential testing and assessment of Solow s 1956 growth model proposed by Mankiw et al 1992 and a series of papers evaluating the latter First the assumption of a common rate of technical progress maintained by Mankiw et al 1992 is relaxed Solow s model is extended to include the different levels and rates of technical progress of each country This increases the explanatory power of the cross country variation in income capital of the OECD countries to over 80% The estimates of the parameters are statistically significant and take the expected values and signs Second the estimates merely reflect a statistical artifact This has serious implications for the possibility of actually testing Solow s growth model Illus World Economic and Financial Surveys, 1988 International Monetary Fund,1988-01-01 This paper examines the World Economic Outlook forecasting record for the principal performance indicators for the major industrial countries and corresponding aggregates and for groups of non oil developing countries Several criteria were used in evaluating the forecasts the computation and evaluation of various summary statistics of forecast accuracy bias and efficiency comparisons with alternative forecasts naive forecasts and forecasts produced by the Organization for Economic Cooperation and Development OECD and by national forecasting agencies the examination of turning point errors and forecast performance in defined episodes and finally some attempt to explain forecast error in terms of unanticipated developments in policy variables and oil prices In judging the forecast performance of the World Economic Outlook a number of points must be kept in mind Most important it has to be recognized that the period since the inception of the World Economic Outlook as a regular forecasting exercise has been extraordinarily rich in economic upheavals which have made the odds against accurate forecasting formidable World Economic and Financial Surveys International Monetary Fund,1989-01-01 This paper describes the functioning of labor markets and to eliminate other structural obstacles to noninflationary growth The decline in the price level in the home country will involve a rise in the real money supply and if output is sluggish this will result in an excess supply of money This in turn will lead to a

drop in the domestic interest rate and given foreign interest rates to a temporary depreciation of the exchange rate Structural measures could also affect investment and the current account by raising the rate of return on capital in the home country If capital is internationally mobile a higher rate of return on capital would result in a rise in investment and a temporary deterioration in the home country's current account which will be financed by an inflow of foreign capital The quantitative impact of financial market deregulation on the economy is rather uncertain

Macroeconomic Dimensions of Public Finance Mario Blejer, Teresa

Ter-Minassian, 2002-09-11 There is no magic formula for balancing fiscal policy and economic performance As a scholar and policy advisor Vito Tanzi has made a major contribution to identifying links between public finance and macro and microeconomic consequences His findings bear relevance in both developing and industrialized economies The essays in this volume and its companion Fiscal Policy and Economic Reform highlight many of these interconnected issues for instance the interaction between budgetary policy and economic aggregates such as employment inflation and growth the implication of economic linkages for designing fiscal policies expenditure policies and alternative deficit financing strategies the trade offs between macro and microeconomic objectives The list of contributors includes Max Corden John Makin Ronald McKinnon and Richard Musgrave

How Can Cambodia, Lao PDR, Myanmar, and Viet Nam Cope with Revenue Lost Due to AFTA Tariff Reductions? Kanokpan Lao-Araya, 2008-12

In joining the Assoc of Southeast Asian Nations ASEAN and ASEAN Free Trade Area Cambodia Lao PDR Myanmar and Viet Nam have agreed to comply with the Common Effective Preferential TariffCEPT Scheme which reduces intra ASEAN tariff rates on certain imports and may reduce gov't revenue This study proposes tax structure and tax admin reforms and other policies that can be introduced to enhance revenue collection They can Strategically allocate goods among the fourCEPT scheme lists Improve their tax systems by replacing traditional general sales taxes with Value Added Tax Reduce inefficiencies that impede tax collection and Discourage tax avoidance and evasion and reduce corruption among tax officials

Economic Growth and Poverty Reduction in Viet Nam Arsenio M. Balisacan, 2011-04 Viet Nam's dramatic transition and growth in the 1990s have been attributed to a series of reforms known as doi moi which began in the late 1980s Economic growth of nearly 8% yearly benefited the poor and reduced poverty from 61% in 1993 to 37% in 1998 The proportionate increases in the incomes of the poorest quintile were appreciably larger than those of the top 20 or 40% of the population This result is at variance with typical findings for other countries which indicate that welfare gains from growth are smallest for the lowest quintile and rise with income group The results for Viet Nam suggest that the faster the growth rate the lesser becomes the role of distributive factors that directly influence the poor's well being A print on demand report

and External Debt of Developing Countries, 1987 *Monetary Poverty Estimates in Sri Lanka* Neranjana

Gunetilleke, 2008-05 Provides an introduction to poverty related data available in Sri Lanka monetary measurements of poverty carried out using this data The lack of an official poverty line in Sri Lanka until June 2004 has over time generated a number of poverty lines corresponding poverty measures While these poverty measures have provided a good base for poverty analysis this paper also touches on the problems generated by the use of multiple methods The release of the official poverty line by the Dept of Census Statistics can be seen as a major step forward in the debate on poverty measurement in Sri Lanka Charts tables Practices of Poverty Measurement and Poverty Profile of Nepal Devendra Chhetry, 2009-03

Reviews the poverty measuring practices available measures of poverty and economic growth figures of Nepal The poverty rates for FY 1976 77 1984 85 and 1995 96 are found to be not comparable due to change in methodology over time The three poverty rates average 40% Nepal has experienced high economic growth during the 7th 1985 86 to 1989 90 and 8th 1992 93 to 1996 97 Plan periods with no strong evidences of poverty reduction This incompatible result is partially explained by comparing growth of the agricultural sector with the role of the sector in providing employment and income generation at the household level and by comparing social indicators particularly literacy rate with the growth of the nonagricultural sector

Tables **A Computable General Equilibrium Model of Nepal** Timothy Buehrer, 1993 **Labor Market Distortions, Rural-Urban Inequality, and the Opening of the People's Republic of China Economy** Thomas Hertel, 2008-05

Evaluates the impact of some key factor market reforms on rural urban inequality income distribution using a household disaggregated recursive dynamic computable general equilibrium model of the People's Republic of China It also explores how these factor market reforms interact with product market reforms currently under way as part of the country's World Trade Org WTO accession process The simulation results show that reforms in the rural land rental market hukou system as well as increasing off farm labor mobility would reduce the urban rural income ratio dramatically Furthermore the combination of WTO accession factor market reforms improves both efficiency equality significantly Charts tables graphs

The Tyranny of Numbers Nick Eberstadt, 1995 In this wide ranging study Nicholas Eberstadt demonstrates that some of the most basic of today's domestic and foreign policies have been buttressed or justified by what turns out to be misanalysis or misuse of available facts and figures The Tyranny of Numbers not only warns about the ways the statistics are being misused in government policy in the United States and abroad but explains how this process can end up injuring vulnerable groups or distorting the workings of the democratic system *Transactions to Resolve Failed Depository Institutions* United States.
